The Farmer and the Research Worker

The prairie provinces of Canada have completed the harvesting and threshing of the greatest grain crops in the history of Canada, judged from the standpoint of volume. It is conservatively estimated that the wheat crop alone will not be less than 500,000,000 bushels, and that the other four principal grains, oats, rye, barley and flax, will add close to another 500,000,000 bushels to the total bringing Canada's grain yield for the first time in measurable distance of a billion bushel crop.

In almost every respect the season of 1928 was ideal from the standpoint of seeding, growing, cutting, and threshing and the acreage seeded showed a substantial increase over former years. There was an absence of rust and other parasites, ample moisture, taking the country as a whole and generally an absence of those conditions which result in a lowering of yield. The only fly in the ointment was the killing frosts of the third week in August which caught the later sown crops and those which from one cause or another had not matured. The result was disastrous from the standpoint of grades, and consequently materially lowering in prices of a large part of the total production.

According to a rough estimate of the Saskatchewan crop it is stated that about one-third of the wheat will be of the contract grades of 1, 2 and 3 northern, that another one-third will grade number 4, and that the remaining one-third will grade below that figure.

It is within, the power of our farmers to partly offset the losses occasioned by dry seasons through the adoption of the most scientific methods of farming; they can increase yields and grades by using good, clean seed and by waging continuous warfare on noxious weeds; they can insure their crops against hail. But they stand helpless before the icy clutch of Jack Frost.

Addressing the annual convention of the Saskatchewan Division of the Canadian Weekly Newspapers Association at Regina, recently, Hon. W. R. Motherwell said he knew of only one way to beat out Jack Frost, and that was to get ahead of him. He had reference to the development of wheat with earlier ripening qualities. In this connection he made mention of the valuable time gained through the development of Marquis of the Old Red Fife, and brought the cheering message that as a result of the experiments this year with Garnet and Reward, there was every expectation that a further notable advance would be made. According to Mr. Motherwell, where Reward wheat was grown by farmers all the prairie provinces, under arrangements with the Department of Agriculture, in over 80 per cent. of cases Reward was safely in stock before the August frosts. He expressed himself as quite hopeful that western farmers would yet be in a position where they could and would beat out Jack Frost.

Experiments have been conducted for some time past to determine to what extent the drying processes for damp wheat affects milling and baking qualities, and recent announcement is to the effect that, on the whole, the quality of the wheat is not seriously affected.

Now the Universities of the three prairie provinces and the Dominion Research officials are engaged in determining the effect which frost has on milling and baking qualities. Hundreds of farmers this year have had the experience of marketing wheat, weighing the full sixty pounds or more to the bushel but which, because of frost effect on the chaff, has been graded away below what would otherwise have been obtained. Rightly or wrongly there is an impression that this frost, while marring the appearance of the kernel, does not seriously affect the quality, and that the producer is sustaining a loss all out of proportion to the amount of damage done the grain; that, in a word, while the farmer-producer loses, the miller gains because he secures good milling wheat at a much less cost. The scientists are now striving to get at the real truth of the matter.

Thus are research workers for Governments and Universities working hand in hand with the farmers in endeavoring to advance the interests and prosperity of agriculture, through the development of earlier ripening grains, the elimination of rust, and in determining the actual effects of moisture and frost on the true commercial value of grain. The effort is to save hundreds of millions of dollars to the agriculturists of Canada.

Canada is spending more money than ever before in scientific research work, and the Dominion Government announces that such expenditures will be still further increased. No body of men in the Dominion stands to gain more from such work and expenditures than do the farmers of the West. The whole weight of their influence should be back of this enlightened policy.

Make Commander In Royal Naval Reserve

Canadian Awarded V.C. In Great
War Receives Promotion

The promotion of Lieut. Commander Ronald Neil Stuart, V.C., D.S.O., a Canadian, now in the Royal Naval Reserve, to the rank of commander, recalls the thrilling exploit for his participation in which Commander Stuart received the highest decoration for bravery in the gift of his sovereign. Stuart was one of two Canadians awarded the Victoria

Cross while serving in the Royal Navy during the great war, the other being Lieut. R. Bourke, of Nelson, B.C.

The action for which Commander Stuart was honored was published in the London Gazette, dated Nov. 20, 1918, seventeen months after the event, and it was under provision 13 of the Royal Warrant which enables a ship's company to select members of their personnel for the distinction that the Canadian was awarded the decoration by ballot. Commander Stuart was a colleague of no less a redoubtable fighter in the war story of British hush ships than Captain Gordon Campbell, V.C., the flyfisher man of the "special service."

The hush ships were a product of anti-submarine campaign. They comprised colliers, freighters, merchantmen, yachts and even fishing smacks carrying concealed armaments and specially selected crews.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Singing Master—Your wife's voice is greatly improved. Husband—Yes, but not cured yet.

The heart of the average adult is 5 inches long, 3½ inches broad and 2½ inches thick.

Public Flying Clubs

Toronto and Montreal Lead Dominion
In Number of Flying Hours

The public flying clubs of Toronto and Montreal are leading their sister clubs throughout the country in the matter of flying hours registered by their aeroplanes, according to the latest statistics available at the civil aviation branch of the department of national defence.

The Toronto planes have registered 887 flying hours, Montreal 590 hours, and Ottawa, next in line, 480 hours.

Other clubs and their records follow:
Regina, 303 hours; Edmonton, 266 hours; Victoria, 77 hours; and Calgary, 37 hours.

Touchees that Add Style to Dresses

By MAE MARTIN

It's amazing to see how easily out-of-style dresses are transformed by a few buttons, a little braid and the quick magic of home tinting or dyeing.

Your tinting or dyeing will always delight you, if you are sure to use only true, fadeless, Diamond Dyes. Tinting with them is easy as bluing, and dyeing takes just a little more time. New colors appear like magic right over the old colors. They give all the shades, with never a hint of that faded look which comes from inferior dyes. Insist on Diamond Dyes and save disappointment. "Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Allenby Is Honored

The distinguished service medal of the American Legion, highest honor that members of the former service men's organization can confer, was presented to Field-Marshal Viscount Allenby, of Great Britain, by National Commander Edward E. Spafford at the Legion Convention at San Antonio, Texas.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions illnesses will take cold—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels and sour stomach. They are absolutely safe—being guaranteed to contain no drug, no harm to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Not a New Business

Evidence of run-running 113 years, ago has been uncovered at the customs house in Mobile, Alabama. Customs agents, searching through old federal records, found a tiny scrap of paper—evidently the last paragraph of a letter—informing federal officers of the discovery of 143 quarts, presumably liquor, submerged in a marsh.

HONORED BY NEWSPAPER ASSOCIATION

SAM R. MOORE

Publisher of the Swift Current Sun,
President of Saskatchewan Division
of the Canadian Weekly Newspaper
Association.

Canadian Weekly Newspaper Association

Saskatchewan Division Elects Officers
At Convention Held in Regina

Sam R. Moore, publisher of the Swift Current Sun, was the unanimous choice of the Saskatchewan division of the Canadian Weekly Newspaper Association, as president for 1928-29. The election of officers was held at the closing session of the two-day convention of the organization held at the Hotel Saskatchewan, Regina. Officers elected are: Hon. S. J. Latta, honorary president; C. R. McIntosh, M.P., North Battleford, honorary vice-president; T. H. B. McCullough, the Review, Weyburn, immediate past president; Sam R. Moore, president; H. G. Siedrake, North Battleford, Optimist, vice-president; S. J. Dorman, the Despatch, Alameda, secretary-treasurer and the following members of the executive: W. Ashfield, The Sun, Grenfell; B. M. Frith, The Recorder, Wakarusa; Z. Zubar, The Citizen, Kerrobert; W. T. Morphy, The Sun, Vincent; Andrew King, The Enterprise, Rouleau; S. N. Wynn, The Enterprise, Yorkton.

Upon the invitation of the Regina City Council and the Regina Board of Trade, Regina was decided upon as the meeting place for 1929.

Manitoba Radio Station

Largest Broadcasting Station To Be
Operated In Canada

The largest radio broadcasting station in Canada is now operated by the Manitoba Telephone System.

The new broadcasting set is fully modern in every respect and compares favorably with the best stations in United States. The present station now being operated by the telephone utility was installed a few years ago, but the rapid progress in the radio industry has made it out of date.

The new set will be installed at Manitoba Agricultural College and broadcast by remote control from the Sherbrooke street telephone exchange in accordance with present practice.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. Every effort they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Hop Acreage In Canada

The total acreage in Canada of hops in bearing in 1927 was 1,037 acres, or practically double the 594 acres produced in 1926, which was quite the largest acreage up to that time. The average yield per acre was 1,375 pounds and the total yield 1,425,875 pounds, or 7,292 bales. The average price received per pound was 32 cents, making the total value of the 1927 hop crop \$456,280, as compared with \$367,240 in 1926.

The Oil Of Power. It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has been proved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

"Hey, Miss Watsyourname!" shouted the boss. "What's the phone number of Brown & Company?"
"O," replied the new stenog, dabbling her nose, "approximately 2000 Something."

Headache? Relieve with Minard's Liniment.

Many of us are kept out of a lot of mischief by being out of funds.

ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer Manufacture, to guard the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Shortage Of Butter

Canadian Production Not Keeping
Up With Domestic Requirements

J. A. Caulder, President of the National Dairy Council of Canada, told the delegates to the annual meeting of the Dominion Mortgage and Investments Association, that Canada this year would be 15,000,000 or 20,000,000 pounds short of supplying her own butter requirements. The dairy industry has not kept pace with increased population, he said, and Canada had the highest per capita consumption of butter in the world—approximately 28 pounds a year.

Those who thought that mining was an underground operation will be surprised at the growing use of aeroplanes in that industry.

COUGHS

are Nature's signals warning that resistance is broken and the body undernourished.

Scott's Emulsion

is a blessing to all who need strength. It helps keep the body vigorous and healthful. Try it!

Nail GYPROC right over Old Walls

GYPROC Advantages for Farm Buildings

Easy to use.
Low cost.
Workable as lumber.
Cannot warp, bulge,
crack, shrink or burn.
Takes any decoration.
Resists heat and cold.
Vermine proof.
Eliminates repairs.
Ideal for lining garages,
poultry houses, barns,
grain bins, and other farm buildings.
Especially suitable for converting attics and basements into extra rooms.

How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing GYPROC right over the old, unsightly wallpaper. When you've decorated with Alabastine your home will be as attractive and comfortable as any home can be.

Use Gyproc for partitioning off extra rooms, renovating attics and basements, and making grain bins, stables and other farm buildings fire-safe and vermin-proof. You can put it up yourself—easily, quickly and at a substantial saving.

Gyproc Joint Filler, applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.

CLINIC AT IRMA WAS A SUCCESS

The Clinic held at Irma on October 15 and 16 by Drs. Washburn, McConchie and Dr. Williams, dentist, was taken advantage of by many people having children who needed attention, 27 nose and throat operations besides minor operations and teeth and vaccinations were done and all patients are coming along nicely. Judging from the satisfaction manifested by the parents the Clinic proved to be all and more than had been anticipated, and if the people in and around Irma are interested in having these services they are available every year if an application is sent in the early part of the year. Mrs. McConchie and Williams and two nurses stayed over until Wednesday morning and were close at hand to look after any patients who might need attention during Tuesday night. The doctors and nursing staff were splendid with the children and gained their confidence by their cheery ways.

The ladies of Avondale U.F.W.A. who applied for the clinic last spring wish to thank Mrs. McCloud and the ladies of the Irma Aid for the loan of utensils needed at the clinic, also the U.F.W.A. have been requested by the parents of patients who found it necessary to stay at the Hall Tuesday night with children, to thank Mrs. Schenert for her kind thoughtfulness in bringing sandwiches and tea to the hall for night lunch.

Report of Clinic at Irma Oct. 15th and 16th, 1928

No. of extractions 83.
Extractions under General Anæsthetic 83.

The above report was received from Elizabeth Clark, Supt. of Public Health Nursing Dept. Edmonton.

Fire Completely Destroys Strawberry Plains School

Early Wednesday morning Strawberry Plains school house was discovered to be on fire and in a short time was completely burned down, as efforts to save it were futile. How the fire started is unknown. The school and contents were valued at around \$15,000, with \$1100.00 insurance. We understand the school board will rebuild the burned structure as soon as possible, so that the pupils will not lose too much of this year's term of school.

CARD OF THANKS

Mr. and Mrs. Chas. Pyle wish to express their heartfelt thanks to all neighbors and friends for their acts of kindness and assistance during their recent bereavement.

PROMOTED

MR. ALBERT WILCOX

who was recently promoted to the position of assistant to the general manager, western region, Canadian National Railways. Mr. Wilcox, who was general superintendent of transportation, is well known throughout the west.

NEWS FROM AVONDALE DIST.

The Current events given by Mrs. Walter Gray at the Avondale U.F.W. meeting will be of interest to many in and around Paschenale and Avondale and other appointments. Below a picture of the smiling face of Wallace Sterling was the following, taken from "The Gateway." Wallace Sterling who will guide the destinies of the University of Alberta rugby team in the future is a man eminently fitted for the position. While attending the University of Toronto from which he graduated with honors in History and Philosophy he was a prominent member of the Sr. Rugby team. From early season appearances he appears to be everything desirable in the way of a coach. In the first place he knows the game perfectly both technically and practically. Secondly, nature has endowed him with a quiet coolness and comradely earnestness which qualifies him markedly for his position.

Mr. Sterling is a lecturer in the University's Dept. of History and is a brother of Mrs. N. W. Haines who is well known in Varsity dramatic circles.

Mrs. Haun received the sad news on Saturday, October 20th that her father Mr. Ashton, who resided at Fort Saskatchewan had passed away that morning. Mr. and Mrs. S. M. New and Mrs. Haun left immediately by auto for Fort Saskatchewan. Mr. Ashton visited at the Haun home over a year ago and will be remembered by many of Avondale people who had the pleasure of hearing his talks on the Bible, as he was a very enthusiastic Bible Student. The Haun family and Mrs. New, a grandchild of Mr. Ashton have the sympathy of the community.

Avondale U.F.W.A. held their meeting on October 20th at the home of Mrs. S. Thomson. Owing to some members having children who were operated on at the Clinic in Irma several were absent. However a splendid afternoon was spent. The next meeting to have been held on November 17 has been called off and instead the ladies of Avondale have accepted an invitation to visit the Autumn Leaf local at the home of Mrs. W. Pollard and Mrs. Connolly of Avondale local has kindly consented to give her demonstration on dressmaking for the benefit of the two locals on that date, November 17th.

Mr. and Mrs. W. Brodie who have spent the past year at the home of Mr. and Mrs. M. New left on Thursday for Edmonton after visiting a few days there they will go to South Vancouver where Mr. Brodie has accepted a position with the Raleigh Co.

Mr. and Mrs. New and Mrs. Haun returned from Fort Saskatchewan Wednesday. Mrs. Haun will stay a week with her mother before returning.

AVONDALE

The Women's Institute will meet at the home of Mrs. Hassie, on Thursday, November 1st. All the ladies are invited.

Mrs. J. V. Vance has been here from Crossfield, Alberta, attending her brother's, Mr. Mathison's funeral. Mrs. G. S. Quast, from Macklin, Sask., has been here attending her brother-in-law's, Mr. Mathison's funeral.

CAROL & WHITE

OPEN NEW GARAGE
More evidence that Irma is steadily growing and forging ahead is seen in the opening of the new garage by Messrs. Carol & White, who have the Ford agency and other important agencies that go to make up a first class garage. The building is well equipped with machinery and tools for repair work to all kinds and makes of cars and a staff of competent mechanics are on hand to give you service.

FOR SALE OR EXCHANGE—6 months old Yorkshire Boar. Apply H. W. Love, Irma.

FOR SALE—Six good Yorkshire sows, ready for breeding. Price \$20, each. Apply H. W. Love, Irma.

"Now that I've had my hair bobbed, I don't think I look so much like an old lady," remarked an elderly Fabian lady to her husband. "No, my dear," he replied, "Now you look like an old gentleman."

JUICE WILL SOON BE TURNED ON

The Electrical Engineers, Ltd., have completed wiring most of the buildings and elevators in Irma, and everything is in shape for the turning on of the new-power by the Calgary Power Co. Two new transformers have arrived and the rest should be here any day, when we understand the system will be complete.

WHOOPING COUGH

Whooping Cough is very dangerous to children and sometimes fatal to grown-ups, more people die from it than from Scarlet Fever.

The Mother whose children have had whooping cough does not need to be reminded of its symptoms. She can remember her child running to her gasping for breath, catching hold of her skirt for support, and finally breaking into that painful rasping cough. Whooping cough starts with a slight cold, running at the nose, fever, and a dry cough. The eyes are blood shot. After a week the cough gets worse and the child coughs many times in succession. He becomes pale and draws in his breath with a sharp scraping sound. This is the whoop. In some cases this is not always present.

If a child shows the first signs of whooping cough, call the doctor, and follow his directions absolutely.

The child frequently vomits because of hard coughing. As a result many children lose weight and become weak. In this condition they easily get T. B., pneumonia or other serious conditions. Do not give the child heavy foods. Give those easily digested. Milk and eggs are very good. Give an egg well beaten in milk every time he loses a meal.

All discharge that comes from the mouth and nose while the child is sick should be received in a piece of clean old linen or rags and burned. It is through carelessness in this that the disease is spread. Keep separate cups, glasses, plates, and spoons for the child while he is sick. See that the child gets plenty of fresh air. Keep the room well aired night and day. Unless it is raining, take him out every day, in the yard, or into the park.

Keep the child away from others, even after the whoop has stopped he can give the disease to others. Wait until the doctor says he is well. Remember that whooping cough is very catching. Be sure that your child does not spread the disease and possible death to others.

Pamphlets on communicable diseases can be had from the Canadian Red Cross Society, 408 Civic Block, Edmonton.

The Wastebasket

"You ought to see the new altar in our church," said a Jarrow fellow to his Irma girl. "Well, lead me to it," she replied.

Some girls change color because the first box was unsatisfactory.

Heard at the ladies social: "These new neighbors of ours have no automobile, no radio, no phone, no fur coats, no electric washing or cooking machines—" "Heavens, they must have money."

Heard at the ladies social: "I have never heard a word uttered against her." "What, hasn't she any friends?"

"Why haven't you a fire escape on this building?" asked an inspector of a hotel proprietor at Kinsella. "Well, you see this is leap year," the landlord replied.

Heard at the poker party: "Do you know I haven't spoken to my wife for over a month?" "I wouldn't worry over that, old man,—your turn is bound to come eventually."

WEEKLY REVIEW PROV. MARKETS

BEEF—Trading on the Edmonton market is reported as working on lower prices, due to heavier receipts being more than the demand can readily absorb. Choice heavy steers made from \$8.25 to \$8.75; choice light \$8.50 to \$9; good \$8.25 to \$8.50; medium \$7.25 to \$7.75; common \$6 to \$7.

FEEDERS, STOCKERS—Feeder steers brought from \$6.50 to \$8; stockers \$6 to \$7.75; stock heifers \$5 to \$6.50; and stock cows \$5 to \$6.

HOGS—Edmonton reports thick smooths fed and watered are selling at \$9.50, with select making \$10.

EGGS—Very few fresh stocks being handled. Report of small offerings of B.C. and Alberta pullet eggs. Storage stocks are supplying bulk of trade.

HAY—Demand picked up slightly during the week, with receipts still slow.

GREENFEED—A little movement with quality good it is selling readily, at around \$11 per ton.

FEED OATS—Demand is active, but the supplies are light owing to farmers being still busy. Only new crop being handled now.

FURS—Few coyote skins being offered with odd ones in fairly good condition, but the bulk are showing the effects of having been caught too early. Should leave them for another week or so. Will soon be prime. Few badger being caught, but these are hairy and of no value. It will be around December 1st, before these are much good. Weasel beginning to turn.

WHEAT CROP, ESTIMATED AT 134,150,520 BUSHELS

Alberta's 1928 wheat crop will total approximately 134,150,520 bushels, according to an estimate made on Saturday by Hon. George Hoadley, minister of agriculture and health. The average yield per acre from the 4,707,536 estimated sown to wheat will be 29 bushels.

In making his estimates, the minister said his figure on the average was arrived at as a result of deductions from Dominion Bureau of Statistics investigations, while the average and total yield figures were based on the returns of threshermen throughout the province.

Continuing, the minister said that the crop was showing a marked decrease in yield and reduction in grade as compared with estimates made several weeks ago. The damage done to both quantity and quality through frost was greater than was at first anticipated. Experience of previous years showed that subsequent returns would slightly reduce, rather than increase preliminary estimates, as these represented a large proportion of grain from summerfallow. It was apparent, that as results of the reduction in grade, considerable of the crop would be retained as feed rather than shipped to market.

Above Average
While the yield for the present season was somewhat disappointing, showing, as it does, a drop of seven bushels an acre as compared with last year's phenomenal returns, the minister pointed out that the 1928 yield is still two bushels an acre in excess of the last 10 years' average.

Just hold a public office if you want to see yourself as others see you.

CHURCH NOTICES AND ACTIVITIES

Services Sunday, October 28th
Ross — 11 A.M.
Alma Mater — 2 P.M.
Roseberry — 3 P.M.
Irma — 7.30 P.M.
Church School at 11 a.m. is for everybody.

CHURCH NOTES

The Trail Ramblers will meet in the basement of the Church on Friday evenings at 8.30 p.m. Boys twelve years to eighteen years only.

Mission Band Friday at 3.45 p.m. for boys and girls twelve and under.

Anniversary of the Church and anniversary supper Sunday and Monday November 18th and 19th.

The Golden Text for next Sunday Act 20:35. Remember the words of the Lord Jesus, how he said, "It is more blessed to give than to receive."

Some think of this saying as a bit of idealism which can hardly apply to them. Idealism? Wouldn't you rather endow a hospital than be a patient in the incurable ward. Isn't it better to be in a position to send the Gospel to the heathen than be a heathen yourself? The ability to give shows that you are better off than the other fellow, doesn't it? So much for the selfish side. Thank God, it has another side. There's a thrill, and a charm and an uplift in lending a helping hand with money in it, that isn't equalled by any other form of sport. The thought of the text is doing for others rather than showing a selfish regard for oneself.

The C. G. I. T. takes the worship period next Sunday.

We had Mr. Walker, Supt. of Metropolitan Sunday School, Edmonton at the Church School last Sunday. He gave us a few cheery words of greeting.

ST. THERESA CATHOLIC CHURCH
Services Sunday, November 4th.
Mass at 11 A. M.

DEATH OF BABY PYLE

The funeral services for the infant daughter of Mr. and Mrs. Charles Pyle were held in the United Church at Irma on Sunday afternoon. The Rev. Mr. M. L. Wright took charge of the service both at the Church and at the cemetery.

Little Violet came to brighten the home just sixteen months ago and was called to her eternal home on Friday night, October 19th after but a few hours of sickness caused by acute indigestion.

The pallbearers were, Frank and Robert Maguire, Ralph Schenert and Ray Lock. The hymns sung by the choir were "Asleep in Jesus," "When he cometh to make up his jewels" and "Funeral Hymn for a Child" from the Methodist hymn book.

The full church testified to the deep sympathy the community have for the parents in their bereavement.

The many friends of Mr. and Mrs. W. A. MacRae will be sorry to learn of the severe illness of Mrs. MacRae and of the death of their infant child at the Hardisty hospital. The funeral services were conducted by the Rev. M. Lindsay Wright at the Hardisty cemetery.

The Ladies Aid of Irma United Church are putting on their annual Bazaar at Keifer's Hall on Saturday October 27th. A good supply of hand work for sale. Fish pond for the wee folk. Tea will be served afternoon and evening beginning at 3 o'clock. Everybody come.

POOLS STRONGER THAN EVER SAYS MR. WOOD

Winnipeg.—That the three western wheat pools are in a stronger position than they ever were is the statement made today by H. W. Wood, Calgary, president of the Alberta Wheat pool, on his arrival today for the general conference of the pools here.

Membership in all three pools was rapidly increasing, Mr. Wood intimated. He would make no comment on the size of this year's crop beyond stating that he believed it had been overestimated. Neither was he willing to discuss the special business for which the conference was called, or to reveal where and to what extent sales of this year's crop had been made.

WORLD HAPPENINGS BRIEFLY TOLD

One of the finest old churches in Moscow, the "Stranney Monastery," is being converted into an Anti-Religious museum.

Leon Vanderstuyft, Belgian bicycle rider, broke the world motorpace record for sustained speed when he rode 70 1/2 miles in one hour.

A report is current in Bucharest that Poland, Rumania and Greece have concluded a military agreement to make a common front against Russia in the event of war.

Thousands of cattle have been drowned in the flood that came after the bursting of the Yser dykes in Belgium and farmers estimate their damage at about \$25,000,000.

The Canadian Press was reliably informed that there is no reason to believe that the Duke and Duchess of York contemplate an early visit to Canada, as rumored in Ottawa.

T. Nichols, of the Royal Canadian Mounted Police, Lethbridge, Alta., will receive the Imperial Service medal awarded by His Majesty the King, according to the Canadian Gazette.

Great Britain and the U. S. have continued for another year their agreement on administrative co-operation for the prevention of smuggling liquor into the United States by ships flying the British flag.

It was reported in League of Nations circles that the Irish Free State, following the example of Canada, is planning to establish a legation in Paris and appoint a minister to France.

The appointment of Jean Knight as French minister to Canada has been announced officially, confirming previous intimations that M. Knight would be sent to Ottawa as France's first diplomatic representative in the Dominion.

Fine Shipment of Herefords

Range Cattle From Alberta Bring Large Sum in Chicago

Ninety-three head of dry cows from the McIntyre ranch in Alberta were recently consigned to Chicago in exchange for a \$10,000 cheque. Cattle men looking over the shipment claim that it is one of the finest lots of range cattle ever forwarded from Calgary. The heaviest animal in the lot tipped the scales at 1,700 pounds and the ninety-three averaged 1,350 lbs. These cattle come from one of the few remaining old-time ranches which is running a herd of upward of 5,000 Herefords.

Men's belts are used mostly for sports wear in Great Britain.

Ships that cannot afford wireless cannot afford crews.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will know what to do. Crude and harmful methods will never appeal to you. Go. Be sure to get the genuine Phillips' Milk of Magnesia, prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Protect Submarine Crews

Italian Has Invention That May Prove of Great Value

Cesare Borghetti, inventor of an apparatus for saving the lives of submarine crews in case of danger, has succeeded in interesting the Italian government in his invention and now gives the press some details of his amazing invention.

Signor Borghetti's apparatus consists of several hollow cylinders attached to the sides of the submarine in such a way that they do not impede the passage through the water. The number of these cylinders depends on the number of men in the crew.

The outer chambers are reached by two doors from the interior of the vessel. Inside of each of these cylinders is another airtight chamber with four compartments holding compressed air.

When the shipwrecked crew is inside the inner chamber and the doors are tightened, a lever releases it from the outer cylinder which is firmly attached to the sides of the submarine. The cylinder containing the men is constructed in such a manner that it will float automatically, to the surface even from a depth of 500 feet.

Any Woman Can Look Stylish

By MAF MAETIN

Most stylish looking women know simple ways to make last season's things conform to this season's styles. Thousands have learned how easily they can transform a dress or a blouse or coat, by the quick magic of home tinting or dyeing. With true, fadeless Diamond Dyes, anyone can do this successfully. The "know-how" in the dyes, Diamond Dyes don't streak or spot like inferior dyes. New, fashionable tints appear like magic over the out-of-style or faded colors. Tinting with Diamond Dyes is easy as bling, and dyeing takes just a little more time. Only Diamond Dyes give perfect results. They have been perfected by over 50 years experience. Insist on them and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Opening of Bay Route

Suggestion Is Made to Hold Monster Excursions From All Parts of Canada

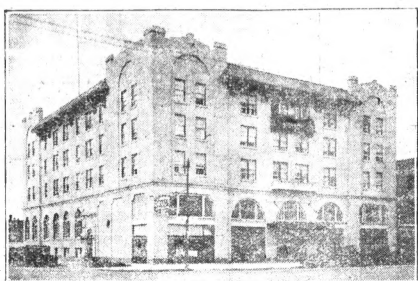

By way of establishing an "entente cordiale" with Mr. Moss Thrasher, secretary of the United Farmers of Canada, Saskatchewan section, suggests that the opening of the Hudson Bay trade route to Great Britain be celebrated by a huge excursion from all parts of Canada, the mid-western states and Great Britain. The meeting place to be on the shores of the bay.

Mr. Thrasher also suggests that at the same time the Federal government should take steps to eliminate all trade restrictions with the Mother Country and bend every effort toward centralizing the huge purchasing power of western Canada in Great Britain, where, he points out, the western farmers sell the bulk of their products.

He believes that this would be the first logical step towards solution of western Canada's immigration as well as industrial problem, and that something should be done when the west is more closely linked with the Old Country by the opening of the Hudson Bay route.

"Western Canada sells its surplus products in Great Britain," he says, "and accordingly should buy manufactured products required from that source. No country can carry on successfully by selling to one market and buying from another. Someone will have to suffer. The lack of balance will eventually be felt."

NEW HOTEL AT LETHBRIDGE

The Marquis Hotel, Lethbridge, Alta., which has been recently opened to the public, under the management of Mr. A. W. Edwards, The Marquis is a fully modern in all its appointments, is a decided asset to the city of Lethbridge, and is proving quite popular with the travelling public. The Marquis Hotel was named after the new variety of wheat of that name, and was built as a community enterprise at a cost of \$275,000.

Cattle Feeding Awards

C. B. Latta, Govan, Wins Prize in Connection With Saskatchewan Competition

C. B. Latta, Govan, Sask., won the first prize of \$100 in the carload lot contest staged in connection with the Saskatchewan farmers' cattle feeding competitions, according to the report of the judges' awards received by Hon. C. M. Hamilton.

Mr. Latta also wins second prize, \$75, in the competition for groups of ten to fifteen animals, and second prize of \$20 in the group of five animals, making a total of \$195 in prize money. In addition he sold his steers at good prices. Mr. Latta made a gross profit of \$49.63 per head on his carload lot; \$43.17 per head on his group of ten, and a gross profit of \$66.70 per head in his group of five. C. J. Peters, of Brownlee, won second prize, amounting to \$75 for the records made by his carload lot. Mr. Peters made good profits. A total of 20 steers were sold at a gross profit per head of \$38.36. A net profit of over \$20 per head. Among other prize winners, B. A. Wright, Drinkwater, won fourth prize in the carload lot, and also fourth for group of five.

A. W. EDWARDS, Manager, Marquis Hotel, Lethbridge, Alta.

Many Planes in Pageant

Thousands of People Attended Air Mail Service Inauguration

The first aerial mail service between Canada and the United States was inaugurated October 1 at St. Hubert aerodrome, near Montreal, where a great aerial pageant, in which fifty planes took part, commenced at 9 o'clock in the presence of thousands of spectators. Planes of every size, even every color, Moths, Reid Ramblers, Swallows, Cabin-type, Vickers-Fairchild, Stinson-Detroiter, Avro Avia, as flown by Hinkler from England to Australia, Leoning Amphibian, Pitcairn Mail/Wing, Tri-motor Ford, and the most interesting of all, three Sikskin fighters, participated in the evolution. The Sikskins were sent by the Royal Canadian Air Force, and are reputed to be the most deadly warring machines in existence.

They were seated across the table from each other in the restaurant, the wealthy octogenarian and the gold digger.

"Will you marry me if I have my health rejuvenated?" he asked. "I'll marry you, all right," she replied, "but you leave your health the way it is."

She—"I've been trying to think of a word for two weeks."

He—"How about fortnight."

Poverty is no disgrace. At least it is better than being a multi-millionaire with chronic indigestion.

The herd of 709 buffalo bought in 1907 by the Dominion of Canada in Tablow, Mont., now numbers 16,000.

DIARRHEA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. E. No. 2, Shannon, N.B., writes—"Last Fall my little boy took very bad with diarrhea, and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

Descriptive Atlas of Canada

100,000 Copies Distributed to School Children in Old Country

School children in the British Isles will this year receive over 100,000 copies of a descriptive atlas of Canada, provided by the Department of Immigration. This is part of an intensive publicity to induce migration to Canada.

The atlas is distributed free to students in the Old Country, through the central office of the department in London. Agents of the department travel through the country in demonstration vans, carrying exhibits descriptively of Canadian industries, and they lecture at the various schools. Copies of the atlas are left with the schoolmasters. Large wall maps are also provided.

The book comprises eighty pages, and is stated to compare favorably with the geographies used in Canadian schools. It contains a large number of colored maps, it contains literature dealing with the physical characteristics, climate and industries of the various provinces. Special emphasis is placed on the opportunities open to those who wish to settle on Canadian farms. The maps have been prepared by the Natural Resources Intelligence Branch of the Department of the Interior, and are stated to be of the most modern type.

The atlas is eagerly received by teachers, officials indicate, and is claimed to have very much to do with the increasing desire by young people to look towards Canada as their future home.

Large numbers of the book are also in demand in the United States and thousands of requests for copies have been received from American schools. In congratulating Canadian officials on the excellence of the book, teachers over the border admit that geographies used in their schools give a very restricted and often inaccurate conception of this country. The atlas is particularly in demand in the farming areas in the central States.

Demand for Canadian Cheese

United Kingdom Takes 87 Per Cent of Export Cheese, and Could Take More

Eighty-seven per cent of Canada's exports of cheese was shipped last year to the United Kingdom. The quantity amounted to 119,000,000 pounds. This was announced by Dr. J. A. Ruddick, dairy and cold storage commissioner for the Dominion, who during his tour of the United Kingdom this summer visited over two hundred importers and wholesalers either at meetings with the provision trade, or in personal interviews in London, Liverpool, Bristol, Manchester and Glasgow. He reported practically the only complaint was that the quantity of Canadian cheese available was not sufficiently large.

The grading system had gained the confidence of the British importing trade, and the largest operator in Canadian cheese on the other side told Dr. Ruddick that he never examined the cheese he bought from Canada, but depended entirely on the grade marks and the grader's certificate. The improvement in the quality of cheese exported is freely admitted and the increased premium for Canadian cheese over that of Canada's chief competitor, New Zealand, is proof for that fact.

Canada's next best customer for cheese was the United States and during the last fiscal year 10.29 per cent of the total export, 14,082,000 pounds, went to that country. Canadian cheese is shipped to twenty-four different countries, and while the exports to the United Kingdom are showing some falling off those to the United States are increasing every year.

Wife (to returning husband at seaside resort): Oh, darling, I'm so glad you've come. We heard that some idiot had fallen over the cliff, and I felt sure it was you."

We have often wondered, in our innocent way, whether the inventor of the telephone booth also designed the breakfast nook.

Interesting Information Regarding Prehistoric Reptiles Discovered In Bad Lands Of Alberta

Under the auspices of the Calgary Rotary Club, Prof. Chas. M. Sternberg, of Ottawa, field paleontologist for the Canadian National Museum, addressed two audiences, recently, on the fossil remains of prehistoric reptiles discovered during recent years along the Red Deer River in the Drumheller District.

"The Dinosaur of the Bad Lands of Alberta" was the title given to Prof. Sternberg's very interesting address and he illustrated it step by step with moving pictures, showing the careful work of excavation, and diagrams and reconstructions of the monster reptiles in their former habitat.

As a single day is to the average life of man, said the professor, so is the entire span of existence of human life on earth as compared with the time during which life in other forms has existed. Life on this planet had been developed for purposes of study, into five great periods, of which the last three periods were the reptilian, the mammalian and human.

Among the most interesting inhabitants of earth during the reptilian period of geologic time was the group known to moderns as the dinosaurs, a name which simply meant, "terrible lizards," said Prof. Sternberg. They were not a single variety, but a large group of which more than three hundred different varieties have been distinguished by scientists, and this group included the most spectacular creatures which have inhabited the globe before or since. In size they graded from one hundred feet in length, the largest creature which had ever walked on earth, to varieties measuring only a couple of feet and closely resembling some of the reptiles on earth today.

The most conservative estimate which has been put upon the period during which the dinosaurs flourished set the beginning of the reptilian age as twelve millions of years ago and the end of that period as not less than three million of years.

In Alberta, said Professor Sternberg, had been found one of the greatest deposits of fossilized remains of these creatures known to exist on earth. Thirty-five species had so far been discovered representing five different families.

Throwing a chart of the North American continent, as it had existed during the later reptilian age, on the screen, the lecturer explained why the Alberta bad lands had been a favorite habitat for the dinosaurs. The eastern and western halves of North America at that period were divided by an immense central sea which had stretched from the Arctic to the Gulf of Mexico, and from the present foothills of the Rockies to the rising lands in what are now the eastern provinces of Canada and eastern states of the American union.

The area where Calgary now stands and the Rockies themselves were then but little raised above sea level, it was explained, and from the higher land slow moving streams brought down great deposits of silt, which piled up along the shores of the central sea, forming great deltas. Vegetation was semi-tropical; palms of many varieties, figs and species of trees which have since vanished, grew in profusion among the sedge delta-lands, and these swamps were the chosen home of the great reptiles.

The disappearance of the dinosaurs was probably due to a number of causes. No great catastrophe was responsible for their extinction. The gradual rising of the mountain areas and the drying up of the central sea possibly cut off their food supply little by little, and some three millions of years ago the last of the species had given up the struggle.

The neighborhood of Drumheller

and Steepleville along the Red Deer river was today the most fruitful hunting ground for those seeking information on the life and habits of these creatures, said Prof. Sternberg. There were probably equally rich deposits of fossils at other places along the margin of the inland sea area, but here in Alberta the Red Deer River, seeking in comparatively recent geologic times for an easier channel had cut its way through the prairie lands which had formerly been the delta-land of the central sea and had exposed great grave-yards of dinosaurs, where their bodies had been buried in the muddy swamps in which they had lived.

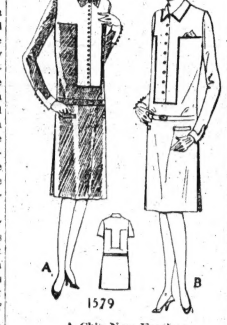

Rich Mineral Areas In Southern Manitoba

Prospectors Report Finding Gold, Silver, Copper and Tin

Vast areas of land, approximately 70 miles southeast of Winnipeg, are rich in mineral products including gold, silver, copper and tin, according to a statement issued by Mayor E. J. Swain, of St. Boniface, who returned to the city from a prospecting trip in Southern Manitoba.

Mayor Swain, in company with one of the oldest prospectors of Manitoba, has been investigating the southern areas for the last two years. The couple have made numerous trips to the land, which for the most part is barren and unpopulated.

The pioneer prospector, who accompanied Mayor Swain on his various trips to the southern area, is the man who assayed the first rock that came out of The Pas. He is a practical chemist and on the recent prospecting trips has done practically all of the assaying.

A Chic New Frock

Extremely smart is the attractive one-piece frock shown here, having a front and back yoke, an inverted plait in each side seam, set-in pockets, and long tight-fitting or short sleeves. Buttons adorn the front closing, and a buckle finishes the trim belt. No. 1579 is for misses and small women, and is in sizes 16, 18 and 20 years. View "A" size 18 (36 bust), requires 3 1/2 yards 39-inch material for dress, and 1/2 yard 39-inch contrasting for yoke and cuffs. View "B" size 18 (36 bust), requires 3 1/2 yards 39-inch, or 2 1/2 yards 34-inch plain material. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Demand For Shingles

Shingle mills have all the business they can handle and orders are booked up so far ahead that buyers are complaining about slow deliveries. On August 24th the Consolidated Shingle Mills of British Columbia Ltd., had orders for 741 carloads of shingles.

Sobriety In Britain

Indications Would Point To Fact That Country Is Going Dry

A striking change is taking place in the drinking habits of Britain. In 1900 the consumption of spirits in England was 32,239,522 gallons. In 1913 it was 22,004,432 gallons. Today it has fallen to 10,412,921, and is growing less.

The figures for Scotland — the home of whisky — are even more significant. The consumption of spirits in Scotland was 8,823,092 gallons in 1900, 6,709,343 in 1913, and 2,456,283 last year.

The decline in beer drinking has been equally striking. Consumption in bulk barrels has been as follows: England, 1902, 31,810,577; 1913, 20,758,800; 1927, 23,418,640. Scotland, 1902, 2,200,759; 1913, 2,119,666; 1927, 1,673,576.

It is not surprising to learn in view of these figures that the leading brewers are contemplating a joint advertising campaign in order to implant the idea that "beer is the healthiest drink."

What is the cause of this new wave of sobriety? Students of social conditions point to new inventions, new habits, wholly new paces in the speed of life. The lure of the cinema, the lure of the wireless, have emptied the public houses. Still another time-honored custom has vanished; no longer does the business man stop out for his glass of tawny port at eleven o'clock. He takes "morning coffee."

Motor cars, too, are playing their part. Time was when the sober horse ambled safely home with the tipsy driver. But the motor car does not know the road so well. Formerly one could drink before driving; today one drives before drinking. A man who has to drive home drinks less, if he drinks anything at all, after he gets home. — London Sunday Express.

Luxuries In The North

Radlos, Victorias and Automobiles Now Seen In Northern Regions

Eskimo igloos at Akiavik, on the Arctic circle are now furnished with radlos and victrolas. Mrs. John A. McDougall, wife of the governor of the Mackenzie District, of the North West Territories, reported recently when she came out to Edmonton from her home at Fort Smith, which lies 600 miles north of Edmonton.

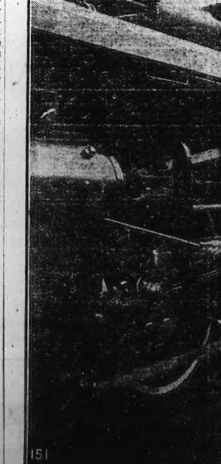

Herschel Island also has an automobile, she reports, the car having been taken up the Mackenzie River last spring. The servant problem in the north country is also a difficult one, the governor's wife remarks, for the Indians are temperamental and work only when they feel like it. This does not help the dish-washing and floor-scrubbing routine of a well-ordered governor's home. — Free Press.

Fisherman (describing the catch) — The pike was so long I never saw such a fish.

Hunter — I doubt if you ever did.

"It took you a long time to pull that fellow's tooth," said the dentist's assistant.

"Yes, he married the girl I loved."

Mr. Samuel Chapman, leader of the Liberal Delegation of the British Empire Parliamentary Association which has just completed a tour of Canada, displays an intelligent interest in the largest passenger engine in the British Empire. The new Canadian Pacific 3100 was exhibited to the visiting Britishers at Windsor Station.

ROSS H. McMASTER, Director, Canadian Pacific Railway.

Ross Huntington McMaster, director of the Canadian Pacific Railway, was born in Montreal on October 11, 1880, the son of William and Lucy (Greene) McMaster; he has lived practically all his life in that city. He was educated at the Montreal High School and Collegiate Institute. His business career began with the Eberhart-Williams Co., of Montreal and Cleveland, of which he became Assistant to the Vice-President and General Manager in 1897, a post he held until 1903. In the latter year he was made assistant to the Vice-President and general manager of the Montreal Rolling Mills Company. On the formation of the Steel Company of Canada he was appointed manager at Montreal, and is now president and director.

Discover New Weeds

Two New Perennial Weeds Are Located At Saskatchewan Points

Two new weeds have been discovered in Saskatchewan and steps have been taken by the provincial department of agriculture to eradicate them before they get a hold on the land.

One is a variety of perennial rape which was found in the Grenfell district, and the other is Russian knapweed, found at Landis, Gull Lake and Tompkins.

The patches where the new weeds were discovered have been staked after the weeds were dug up and destroyed and they will be closely watched by department officials next spring to ensure that any roots that may have been missed this fall do not get a chance to grow.

Both weeds are perennials and it is thought they may have been introduced into the province through the medium of small seeds such as alfalfa.

Alberta To Exploit Tobacco

Experiments in tobacco growing by the Department of Agriculture, at Lethbridge station, have proved so successful that they will be continued, according to a statement made by Dr. J. H. Grisdale, of Ottawa, deputy minister of agriculture. It is the intention to continue the experiments, the results having been fairly satisfactory, as it is believed there is a big opportunity for that industry in Alberta.

Federal Government Willing To Aid Community Efforts In Move To Promote New Industries

Hasty Opinions Are Unjust

Much Harm Done By People Broadcasting First Impressions

Do not judge a man by your first impression, or a country by one or two natives with whom you come in contact. By so doing you may do the man or the country a rank injustice. A Pennsylvania woman who recently returned from a visit to Canada, regaled her friends and neighbors with hours of gossip about the harshness and meanness of an official at the boundary line. To her, Canada was a good land not to live in; the Canadians were good people to leave alone; and her own United States was something that she was now more proud of than ever.

When it was pointed out to her that the official in question was an American and not a Canadian, she could say nothing except "Well, I think no more of him, no matter what he is."

But her reaction toward a friendly people had been broadcast. Many may have heard of the crude official, who will never hear her apology. Her snap judgment not only demonstrated her own ignorance, but placed blame where blame was due. As a matter of fact, the American official was probably doing his duty properly and what seemed "gruff" to the tourist was probably merely a careful attention to duty.

Tourists are walking, talking, perpetual advertisements. The impression a country, a town, or a people make upon them, means much to the country, the town and the people — and vice versa, as well. But it is and when "snap judgment," passes brickbats when bouquets are due. — Richard S. Bond.

B.C. Plans Settlement Of British Immigrants

Local Government Now Busy Exploring Available Agricultural Lands

A proposal for the settlement of available lands in British Columbia by British immigrants will be laid before the British authorities by the local government in the near future, according to an official dispatch to the Sunday Province.

The government is busy exploring the available agricultural lands and as soon as this work is completed the local officials will be prepared to tell the British government just where these new settlers can be placed. No area will be selected until it is ascertained that it will give the settler a real opportunity to make a successful farmer. A block system of settlement is favored.

Agricultural Research

Canada To Take Part In Maintaining Work In Britain

It is announced by Dr. J. H. Grisdale, Deputy Minister of Agriculture, that in response to an invitation by the Imperial Agricultural Research Conference in London, Canada, has decided to take her part in the maintenance of the three Imperial bureaux to be established for the furtherance of agricultural research, with particular attention to soil science, animal nutrition and animal health. These bureaux, which will be established in Great Britain, will cost altogether about \$100,000 per annum, the charges to be split between the member governments.

B.C. Apples For New York

Of the British Columbia apple crop now being harvested in the Okanagan Valley, it is expected that 150 carloads will go direct to New York, although the principal market will be in the Prairie Provinces of Canada. An estimate of the crop is given at 1,250,000 boxes from the Okanagan and Kootenay Districts. The apples are of excellent quality and the yield is the best in years.

Loyal To His Country

A traveller in western Ireland met an Irishman who had returned from Canada, and while talking the Irishman ascribed this country as a heaven on earth. "Why did you leave it, then?" was the natural enquiry. "Sure," was the reply, "any Irishman would leave heaven to go back to Ireland!"

Temperament is the peculiar quality that makes you think you should have your own way because you've got it.

When you look at some of the men fortune smiles on you can't blame her for smiling.

Industrial surveys are expected to be very much to the fore in Canada in the near future as a preliminary to greater development of the natural resources of the Dominion. Following the announcement of Hon. Chas. Stewart, Minister of the Interior, that his department would be glad to co-operate with Chambers of Commerce, Boards of Trade, City Councils, or other local public organizations prepared to carry on such work, there are many indications that raw materials, markets, labour, transportation and other aspects affecting development will be studied on a broad and comprehensive scale in many Canadian cities in the near future.

The extent to which the federal government is prepared to co-operate with local public bodies was recently outlined by an officer of the Department of the Interior, in a conference with the industrial executive of the Victoria Chamber of Commerce. All the resources and industrial information possessed by the Natural Resources Intelligence Service and the services of officers of the department will be available to the cities of the Dominion when they are considering plans for industrial expansion. Industrial engineers would proceed to various centres of Canada when required, and would work in co-operation, with committees of the Chamber of Commerce, Board of Trade, City Council, or whatever public organization was undertaking the industrial survey.

As the result of an industrial survey carried out by the Manitoba Development Board, sixty-five new industries had been established and at Windsor the prospects are "bright following a survey there. It was pointed out that the department had already been successful in assisting in the establishment of entirely new industries in Canada as a result of studies conducted in Ottawa, as in the starting up of a fish meal industry on the Pacific coast which had since been followed by many other plants. Another instance was in the manufacture of casing from skimmed milk, now carried on at a number of points in Canada, also a survey of the possibilities for manufacturing this material was conducted by the Natural Resources Service. One firm in the Fraser Valley is now producing 70,000 pounds of this material per month.

Another recent and unique instance of the effectiveness of such investigations was in the starting up of an industry in the Maritime Provinces to manufacture an insulating quilt or blanket from eel grass, a seaweed occurring abundantly along the shores of the Maritime Provinces and lower St. Lawrence. This industry will add another manufactured product to the list of imported materials replaced by Canadian ones.

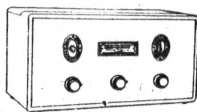

The industrial survey is properly a community affair, the success of which depends primarily upon the initiative and enterprise of the local business men. No outside agency, it is contended, can bring anything like the same permanent interest and detailed knowledge to bear. The industrial survey calls for a well-organized effort of all local business interests including representatives from each type of industry already established, members conversant with transportation conditions, banking and power facilities, the housing situation, labour conditions, etc. It requires the wholehearted support of manufacturers and merchants. In a word, to achieve success, it requires concentration of the collective business brains of the community and on top of that experience in industrial investigations. In this latter requirement the Minister of the Interior has stated that his department is solidly behind the industrial survey and is anxious that organizations which undertake such work should make free use of the experience and investigatory facilities of the Natural Resources Service.

Advertising Attracts Business

IRMA TIMES

The Alberta Oil Gazette

H. W. LOVE, Prop.

A Good Advertising Medium and a
Reliable Newspaper on Oil Activities

With the object of encouraging the satisfactory assimilation of the numbers of British harvesters who will remain in Western Canada when the present threshing season is over, every effort is being made by the Colonization and Land Settlement Offices and the Provincial Labor Bureau to have these men placed as farm help throughout the province for the coming winter.

Of the numbers who came from the Old Land to assist in the harvest, some have returned to their homes—in many cases this course was dictated by their domestic circumstances. There is no doubt, however, that many of these men will return to Canada with their wives and families as soon as conditions will permit them to do so. In addition, it is only to be expected that a certain number of these harvesters who have not fitted into conditions which prevail in this country, will return to England.

There is, however, a great body of harvesters who are willing and anxious to remain in Western Canada providing they can secure winter employment. If these men can tide themselves over the winter and during that period familiarize themselves further with farm work, they should be able to earn satisfactory wages in the spring and have no difficulty in securing farm work on a yearly basis at wages which will leave them in very much better circumstances than those under which they were working in England.

The Dominion Government through the Land Settlement Branch, both railway companies through their colonization branches and station agents, and the Provincial Government through the employment offices, have undertaken to make every possible effort to assist these men in finding winter employment. The experience in handling the British harvester movement in 1923 was that the organizations mentioned above had more applications for winter farm help than there were harvesters to fill these positions and there is little doubt that, provided these British harvesters are prepared to accept reasonable employment for the coming winter months, at wages which farmers are willing to pay, these jobs will be forthcoming.

The main difficulty is getting in touch with the men who are prepared to remain in this country and to put them in touch with winter jobs before they lessen their chances of securing these jobs by leaving the districts in which they are at present working and congregating in the larger centres such as Calgary, Edmonton and Winnipeg. There is no advantage from the harvesters point of view in coming to town as they only have to bear the expense of travelling back to a country point and their chance of securing work in the cities is very small. They stand a much better chance of securing work if they retain their present employment as long as it is available for them and in the meantime, secure work for the winter with the farmers with whom they are thrown in daily contact. Failing this, they can receive the assistance of the officials of the Land Settlement Branch who are located at central points throughout the province to whom almost any farmer can direct them, or from their local station agent or the employment office which organization has 200 voluntary agents throughout the province.

BANK OF MONTREAL APPOINTMENTS

Important appointments in the service of the Bank of Montreal are announced as follows:

Mr. S. C. Norworthy, Toronto, District Superintendent for Ontario, to be Assistant General Manager in charge of Ontario Branches, with headquarters at Toronto.

Mr. Jackson Dodds, Winnipeg, Assistant General Manager in charge of Western Branches to be an Assistant General Manager at the Head Office in Montreal.

Mr. G. W. Spinney, Assistant to the General Manager at Montreal, to be an Assistant General Manager.

Mr. J. W. Spears, Regina, District Superintendent for Saskatchewan, to be Assistant General Manager in charge of Western Branches, with headquarters at Winnipeg.

THANKSGIVING DAY MONDAY, NOV. 12th

Thanksgiving Day will come this year on Monday, November 12th, which will also be observed as Armistice Day. The date has been announced at Ottawa as a Dominion holiday and will be gazetted in each of the provinces to make the observance uniform throughout Canada.

Viking

A wedding of local interest took place at Westminister residence, Edmonton, on Tuesday, September 25th, at ten o'clock in the evening, when Miss Eva M. York, of Cold Lake, was united in marriage to Mr. Kenneth L. Dicks, by the Rev. Mr. W. A. Wilson. The bridesmaid was Miss Yvonne Macoun, and best man was Maurice York, brother of the bride. The bride wore a gown of alic blue georgette with chenille trimming in darker blue with cream slippers and stockings. The groom is at present attending University of Alberta where he is taking the electrical engineering course.

The bride is well known locally having held a position in the Bank of Montreal about a year ago, and made a host of friends here who join in extending congratulations and good wishes to the newlyweds.

H. S. Jensen, proprietor of Recreation Hall has arranged for a big dance Wednesday, October 31st, and has engaged the Killam orchestra to furnish music for the event. The Killam orchestra comes highly recommended, and the evening should be one that will be enjoyable from all angles. The admission is \$1.50 per couple, extra ladies 50c. Tell your friends, it's going to be a good time.

Capt. K. C. McLeod, well known to many local veterans and citizens, has been secured to deliver the principal address at the Memorial Service to be held at Recreation hall on Sunday, November 11th, in the afternoon.

The Armistice Ceremonial Service which is dominion wide in scope will be carried out, supplemented with local numbers. There will also be a special military feature of sounding reveille and the Last Post. Copies of this memorial service will be distributed at the door to those who come and it is more than likely that the hall will be filled to overflowing.

The members of the local G.W.V.A. are at present arranging the program which will be published in a later issue.

The annual meeting of the Viking Curling and Skating Association will be held in the Viking Town Hall on Friday evening, October 26th, at 8 o'clock for the purpose of electing officers for the ensuing year, hearing the financial report, and transacting any other business that may come before the meeting. All citizens, curlers, skaters, please turn out to this meeting.

Mrs. G. W. Green and little son Jack, and Mrs. H. G. Thunell and little son Billy, motored to Edmonton on Tuesday for a few days visit.

Police Magistrate Meredith has been appointed tender of resident game licenses and big game licenses, and anyone in need of same should see him before taking to the woods.

The auction sale held at the residence of Mrs. S. Robinson last Saturday afternoon brought out quite a crowd and all articles found a ready sale.

Mrs. Paul Venstoh and Mrs. Wm. Masson motored to Camrose last Monday and spent the day with their sister, Miss Olga Berg, who attends college there.

Mrs. H. A. Meredith is visiting with relatives and friends at Vegreville for a couple of weeks.

P. J. Wanganess, of Kinsella, passed through here on his way to Edmonton Thursday.

Don. Swift has gone to Edmonton for the winter where he will be employed.

Mrs. Fred Wager, formerly resident of this district, has been a visitor at the Alex Speers home and relatives north of town for a few days.

Miss Edith Giles, field secretary of Young Peoples' Work for the Dominion W.C.T.U. will be in Viking, November 2nd.

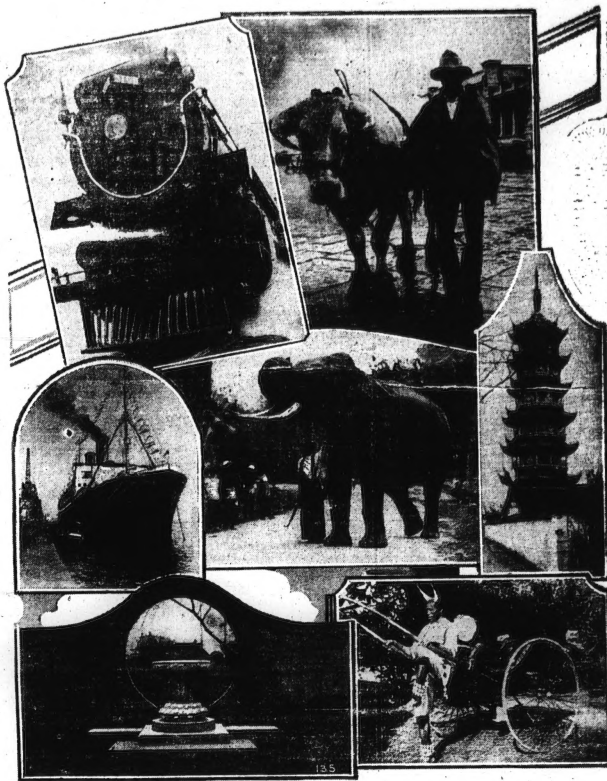

Dr. Richardson will be away from Viking on Friday afternoon and Saturday of this week and the whole of next week October 29th to November 3rd on business. This will in all probability be the last time he will have to leave Viking before spring. The medical doctors will if necessary perform emergency operations in his office during his absence.

The October meeting of the Women's Institute was held in the Church Hall on Thursday, October 18th at 3 o'clock. Mrs. H. M. Hilliker, president, conducted the meeting. The Secretary, Mrs. W. F. Goodwin being absent, Mrs. H. B. Collier was made Secretary, pro tem. Twenty-seven members and three visitors were present. Two of the visitors became members.

It was decided to do nothing for the Junior Red Cross until another year. Mrs. Geo. Brown read an interesting piece on "Scottish Life and Character."

Mrs. Hyslop gave a much appreciated talk on Scotland and its ways and customs. Mrs. Ash gave a good paper on Nervous and Mental Hygiene. Mrs. Little received the gift, a work bag, prepared by Mrs. S. Jones. Hostesses were Mrs. Runyon, Mrs. Clinton and Mrs. Walters.

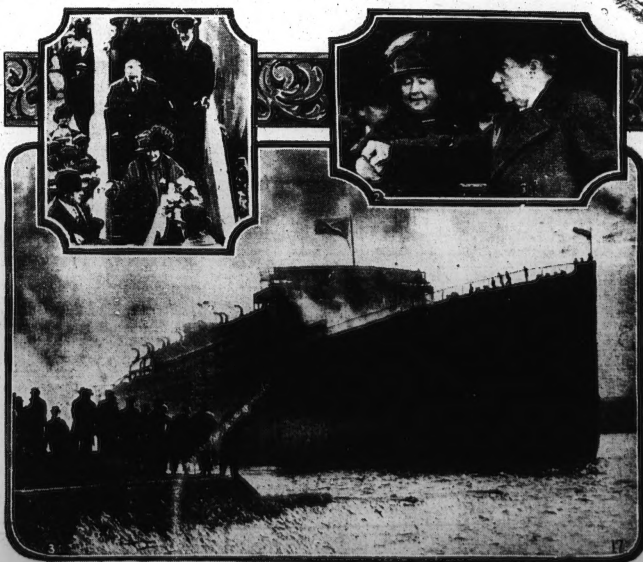

Composing Room Divulges Secrets

The cut above was reproduced from a collection of photographs plus a little art work, and it came about this way. There was a need for an illustration to brighten and balance the page. So we looked through the files. The photograph of the new Canadian Pacific engine came to light first, but, while it illustrates the largest passenger engine in the British Empire, our readers already knew all about it. Put it on one side! Then we saw the picture of the ox which is engaged in shunting freight cars at Trieste. This we thought we could tie up to the engine in some way, but when we saw the photograph of the elephant at Kandy, we thought that it would be much better and easier to write a feature on, say, "power" or "World transport". The African Zulu with the fleckles would have helped a story of this nature, but when we saw the beautiful curves of the Lungwa Pagoda and the graceful lines of the Moon Arch in the garden of the Jade Tree Studio at Shanghai we thought that perhaps we could make an appeal of sorts to the cultural side of our readers. But the office boy was very keen on the locomotives, the make-up man thought he could design a better layout with just the steam and our fair-haired stenographer considered the architecture more artistic.

We compromised by deciding to make a three-column instead of a two-column layout and make them all. What then remained was to tie them up in some way, so we got out our best drawing of the "Empress of France" and—there you have a complete short story. One note—there is a Canadian Pacific train first and at New York boards a Canadian Pacific steamship for the ports and sights of the world. The "Empress of France" doesn't really belong to the sea, because this year she will not make a cruise, but, here she is last year at Rio de Janeiro. The "Empress" is replaced by a cruise service by a "Duchess". Not that this makes a great deal of difference to your editor, there are many readers of this page too, who will spend Christmas in the Holy Land and Christmas blossom time in Japan. They will tour the West Indies in comfort in a ship or will spend the winter in luxury travelling round South America and round the Mediterranean. They have shown us their booklets, and before long they will be showing us their tan and their souvenirs.

The Launch of "The Duchess of Bedford".

No. 1—Leaving the ship after a thorough inspection. No. 2—Premier Baldwin and his wife about to press the release button. No. 3—The Duchess shortly after taking the water.

In the presence of a monster crowd of 25,000 people, the great Glasgow shipyard of John Brown and Co. the "Duchess of Bedford" 21,500 gross tons was launched recently by Mrs. Stanley Baldwin, wife of the Prime Minister. The vessel is one of the four "Duchesses" class of steamers under construction for the Canadian Pacific Railway Transatlantic route. At the launching of the new ship speeches were made by the Prime Minister, Lord Abernethy, Chairman of John Brown and Company, Sir George McLaren Brown, European General Manager of the C. P. R., Captain J. Gillies Manager of the C. P. S. S. and Sir Thomas Bell, Managing Director of the Clydebank Yard. Premier Baldwin recalled his recent visit to Canada and spoke of this country's wonderful possibilities for a marvelous future. "I am quite confident," he said, "that whatever vision and imagination can do for the Empire at large will be done by the Canadian Pacific Railway." After cutting the cord from which a bottle of champagne was suspended, Mrs. Baldwin, before touching the button, which was to be the means of the vessel being released, said: "I name you 'Duchess of Bedford'. May God protect and prosper you. May he preserve and bless all those that go forth with you into the known and unknown." And then, to the accompaniment of tremendous cheering from the large gathering of spectators, the massive structure began to move from the stocks, and gathering impetus as she went, took the water gracefully.

A Double Escape

DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital the need for keeping Zam-Buk, always handy?

When called upon at 3, Bunnhead Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bryan, of St. David's, Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual treatments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it ligated the sore without leaving a scar."

"Again when I fell over a steel fence and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleaned and healed the wound. All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc."

WORLD HAPPENINGS BRIEFLY TOLD

The demand for registered seed next year will be even greater than in previous years in the opinion of the Saskatchewan Registered Seed Growers' Association in Moose Jaw.

Dr. S. Parkes Cadman, chairman of the China famine relief organization in New York City, received information of the reported massacre of about 200,000 persons by fanatic Moslems in Kansu Province, China.

For the twelve months ending August 31, the Dominion Bureau of Statistics reports that alcoholic beverages valued at \$23,816,178 were exported from Canada to the United States.

More than 1,000 Saskatchewan old timers were in receipt of old age pensions under the plan approved at the last session of the provincial legislature at the end of September and there are about 2,000 more applications under investigation.

Capt. T. P. Wordup, 64, formerly Port Wardens of Vancouver and one of the first to operate a vessel on the upper Yukon river during Klondike gold rush, died at his home in Kamloops, B.C., after an illness of several months.

Stocks of surplus military explosives, including more than 120,000 pounds of TNT accumulated by the government during the World War, have been put to industrial uses, the United States Bureau of Mines reports.

Men would do well to copy the fair sex in the matter of scant garments. Dr. Gerald S. Webb, of Colorado Springs, told physicians conferring at the New York Academy of Medicine. Short skirts and tight clothing worn by women prevent pneumonia, he said.

Up to October 3, this year, 100,429 Saskatchewan people have secured licenses for privately owned automobiles. The total number of cars licensed, not including the licenses issued to dealers, is 116,036. During the corresponding period of the previous year, the total was only 102,365.

Dr. Wilhelm Groener, minister of defence, has issued a decree ordering all officers of the reichswehr to leave any function at which the former kaiser or any of the former ruling princes are seated. The reichswehr members are ordered to leave if any function should develop into a demonstration against the German republic.

Cloth woven by Mayans 2,000 years ago in America has been found, according to Prof. Franz Blom, of Tulane University, New Orleans.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1925."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Value Of Tourist Traffic

No Official Figures On Amount Of Money Spent Have Been Given Out

How much money do people from the United States leave in Canada every year? No official figures have been given out, but guesses run all the way from \$100,000,000 to \$400,000,000. The Royal Bank of Canada estimates that \$275,000,000 was left by United States visitors to Canada in 1927, compared with \$140,000,000 in 1925.

This year traffic has been unusually heavy. In Quebec, which 3,430 cars from the United States entered in 1925, 425,000 cars were expected to enter this year. Ontario shows a much larger figure, but the length of stay is less.

It is estimated that 3,000,000 cars from the United States will have entered Canada before the close of the present year. Canada, seeing what is ahead, is busy spending millions of dollars for good roads.

ARE YOU AFRAID OF YOUR MEALS?

Proof That the Stomach Is Weak and Needs Toning Up

Are you one of the many sufferers who dread meal time? Hungry, and yet afraid to eat, because of the pains and discomforts that follow? When the stomach is out of order the whole system suffers, and as the blood becomes thin and watery it becomes increasingly difficult to correct the digestive disorder. There is no tonic for the stomach that is not a tonic for the whole body; thus a blood-building tonic such as Dr. Williams' Pink Pills, not only relieves indigestion, but adds to the general strength.

Mr. D. J. Shaw, Seldirk Road, P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot for me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three boxes more and found I had a genuine remission. I continued the treatment, took moderate exercise, could take plain food without suffering as formerly, and proved that this good blood will restore the stomach and nerves. Any suffering from stomach or nerve troubles will make no mistake that Dr. Williams' Pink Pills is a fair trial."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write today for a copy of the free booklet "What to Eat and How to Eat."

Small boy: "Say, mister, give me a pound of oysters."

Dealer: "We sell oysters by the measure, my boy, not by the pound."

Small boy: "Well, then, give me a yard."

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, flexibility, freedom from rust, and many other good qualities, make it adaptable to a multitude of uses, a chief one being as a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package.

For Calendar Reform

Canadian League Of Nations Society To Get Behind Movement

Authorization of a new membership drive, placing of the "model assembly" movement on a permanent basis, and calendar reform were amongst the important questions dealt with at a meeting at Ottawa of the central executive committee of the League of Nations Society in Canada. Sir George Foster, the president, occupied the chair and a large representation of the membership attended.

Sir George referred to the success of the 1928 membership drive and voiced the hope that the 1928 campaign might bring the number of those in the Dominion actively interested in League aims up to 50,000. Plans for next year's drive were left for formation in the hands of a committee.

The president extended to Grove Smith cordial thanks for the guidance which he gave students of several Canadian universities last June in making a striking success of the "model league assembly" held in Ottawa as an experiment. Speaking on the subject, Mr. Smith referred to the desire of the students that the movement be put on a permanent basis and that it may be organized in various centres throughout the Dominion. A number of universities have already been approached and apparently there was sympathy with the idea.

It was suggested that government support might eventually be obtained for the holding of "model assemblies" in view of the fact that Canada is a member of the League of Nations.

Grove Smith presented a review of steps taken toward calendar reform in the past twenty years. The League Society in Canada, he said, was the logical organization to present the subject and get the measure of public opinion in Canada as the official representative here of the League of Nations in Geneva.

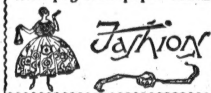

He thought many advantages, financial and otherwise, would accrue from simplifying division of time, say to thirteen equal months a year instead of twelve.

The executive decided to consider data submitted during the coming month and to take action at the November meeting.

Mistress: "One of your references is missing."

New Maid: "Yes, ma'am, it really didn't do me justice."

Winnipeg Newspaper Union

A Frook of Distinction

Decidedly smart in the frock pictured here. The pointed bodice is joined to the skirt having plaits at front and a slightly flared back, a shaped collar, and long sleeves gathered to deep cuffs. No. 1576 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards 39-inch or 2 1/2 yards 45-inch material, and 3/4 yard 39-inch contrasting for View "B."

Price 20 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centers and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

Has Visited Many Countries

The Prince of Wales put this time be one of the most widely travelled young men of his age. When he returns in January he will have officially visited 27 countries—Canada, Australia, India, South Africa, New Zealand, Malta, Gold Coast, British East Africa, Kenya, Tanganyika, Rhodesia, Nigeria, Bechuanaland, Sierra Leone, Malaya, West Indies, United States, Argentina, Chile, Egypt, Spain, France, Belgium, Uruguay, Central America, China, and Japan.

For COLDS of All the Family

This Modern External Treatment is best

Mothers prefer the external treatment, Vicks VapoRub, for children's colds, because it avoids the constant "dosing" so disturbing to delicate little stomachs. You just rub it on the throat and chest at bedtime.

Other members of the family prefer Vicks for their own colds, because it is convenient, and quick in bringing relief.

For free sample, write Vicks Chemical Co., No. 1 Lee St., Greensboro, North Carolina, U.S.A.

VICKS VAPORUB

Acts 2 Ways at Once

Recipes For This Week (By Betty Barclay)

LAMB SOUFFLE

- 1 cup soft bread crumbs.
- 2 cups thick white sauce.
- 2 eggs.
- 1 teaspoon chopped parsley.
- 2 cups chopped lamb.
- 1/2 tablespoon salt.
- 1/2 teaspoon pepper.
- 1 teaspoon onion.

Make and cool white sauce, then mix it with crumbs, seasoning, and chopped meat. Add the beaten yolks of eggs, then fold in the stiffly beaten whites. Put into a well-buttered baking dish and set in a hollow pan containing one inch of boiling water. Bake twenty to twenty-five minutes in a moderate oven. Serve at once.

LEMON JUNKET IN PRUNE WHIP

- 1 packet lemon junket.
- 1 1/2 cups stewed prunes.
- 1 pint milk.
- White 1 egg.
- Sugar.

Put the stewed prunes through a coarse sieve into a large bowl; sweeten to taste. Add the white of egg and beat with wire whisk 10 minutes. Fill tall dessert glasses half full. Dissolve the junket and powder in the slightly warmed milk and pour carefully into glasses, holding a spoon flat over the whip to catch the milk as it is poured in. This careful pouring will keep the whip from floating. Let set in warm room until firm. Grate a little nutmeg over top. Chill.

Demand For Registered Seed

The demand for registered seed next year will be even greater than in previous seasons in the opinion of the officials of the Saskatchewan Registered Seed Growers' Association in Moose Jaw.

Knew He Was Safe

"I think we should take a walk down the town and see the shops, lassie," said an Aberdeen man to his wife. "But they're a' shut," she replied. "D'ye think I didna ken that?" he said. "I'm no' daft n' th'ither."

"You're doing well, young fellow," said the shipping clerk encouragingly, "the foreman praises you to the skies."

"I'd sooner he'd praise me to the boss," was the quiet reply.

We understand that there is a Scotsman in Greenland who keeps his thermometer in the house so it won't freeze.

Scotchmen are said to be untidy, but they like their whisky neat.

Artificial Clouds a Success

German Invention Makes Country Entirely Invisible From Air

Experiments in making cloud screens capable of hiding an entire country side from airplanes have been concluded near Stuttgart, and the results were pronounced highly satisfactory.

Flame throwers of the same type employed during the war were used for distributing gas which, upon striking the air, becomes heavy and opaque. The purpose of the test was to determine if an entire industrial section could be made invisible to hostile airplanes. The flame throwers were mounted on the ground on all sides of the area around which it is desired to lay a screen. Thus the section could be hidden regardless of the direction of the wind.

Planes flew over the region after the cloud was laid and observers declared they were unable to detect a single building through the gas cloud. Photographers returned with plates which proved worthless as far as identification was concerned. The composition of the cloud forming gas was kept secret.

Might Be Good Advice

Rockefeller's Idea Of How To Get On In World

From New York comes a new story concerning John D. Rockefeller, the multi-millionaire.

A young man asked his advice as to how best to get on in the world. "Work hard and set yourself to buy a gold watch," was the reply.

"Yes," queried the listener, "and when you've bought the gold watch?"

"You don't buy a gold watch," replied Mr. Rockefeller, "you buy a gun-metal one and start all over again for a motor car."

"And when you've got the money for a motor car?"

"Well, you remember the watch, if you're not a fool, and go on walking to business."

Animals

Minard's heals bruises, sores, sprains, saddle boils, distemper, etc.

ALBERTA WHEAT POOL NEW TERMINAL ELEVATOR

That the Alberta Wheat Pool is anticipating in future years the great bulk of Alberta's crop will seek the world's markets by way of Pacific tidewater is evident from that organization's activities in building and acquiring terminal elevator space at Vancouver and Prince Rupert.

Just recently a great new terminal has been completed for the Alberta Pool, at Vancouver, by the Northern Construction Company and J. W. Stewart, and with C. D. Howe & Company, recognized as one of the foremost designers of terminal elevators, as the engineers. The capacity of this new terminal is approximately 2 1/2 million bushels which brings the total storage controlled by the Alberta Pool on the Pacific coast up to 5,300,000 bushels.

The new Alberta Pool terminal is located adjacent to the Second Narrows Bridge on the city side of Vancouver Harbor. There its work-houses tower 200 feet into the air. Flanked with huge bins 123 feet high, as material testimony to the foresight of the Alberta Pool farmers.

When the Pool organization started its venture into the elevator business in 1925, it at once laid plans for the securing of an elevator site at Vancouver whereupon to build a terminal at which would be operated in conjunction with the line elevator system to be developed throughout Alberta. At the present time the Alberta Pool has over 300 country elevators scattered through the length and breadth of the province and controls two terminals at the coast besides

the one just built. At Prince Rupert the Pool has under lease Canadian Government terminal elevator with a capacity of 1,250,000 bushels. At Vancouver another government terminal with a capacity of 1,640,000 bushels is also under lease. The combination of line and terminal elevators provide a well balanced elevator system which is greatly in favor with the Pool membership of the Province of Alberta.

The Alberta Pool elevator system works on a patronage basis, that is, excess earnings are distributed to the pool farmers who ship through pool elevators, or direct their loaded cars to pool terminals. Approximately one million dollars excess earnings from the elevator operations during the 1927-28 crop year were returned direct to Alberta Pool elevator patrons.

Reward and Garnet, New Wheat Varieties, Now Holding Attention of Western Growers

Mr. L. H. Newman, Dominion Cerealist of the Experimental Farm, returned to the East recently from an extensive tour of Western Canada. During the trip practically every wheat-growing area was visited. Mr. Newman states that the new wheats, Reward and Garnet, are holding the attention of the western growers.

Some 467 farmers are this year testing Reward wheat. The variety is reported to have done well, though actual figures on yield, etc., have not yet been compiled. Mr. Newman stated that it had been impossible to determine anything definite with regard to this variety's rust resisting qualities because there was practically no rust in Manitoba and very little elsewhere. Conditions generally in the west Mr. Newman describes as distinctly above the average.

Particularly good are the reports on Garnet wheat, one of the originations of the Experimental Farm. Writing on the subject of this remarkable wheat early this year, the Dominion Cerealist stated "the history of Garnet wheat is almost an epic in the realm of scientific achievement. It reveals a story of almost half a century of patient but determined effort, replete with discouragements and disappointments but rewarded ultimately by definite and indisputable gains."

In 1914 Garnet wheat was included in the regular variety test-plots at the Experimental Farm. In 1915 it was tested at the Experimental Farms in the Prairie Provinces. In 1925 the branch farms were able to grow 320 acres, from which was produced about 9,700 bushels.

In 1926, some 6,954 bushels of Garnet seed were offered to prairie farmers, with a four-bushel limit. Some 2,826 farmers, including 862 soldier settlers, secured two to four bushels lots and this, together with seed from increasing test samples by two or three seed growers, made a grand total of some 14,000 bushels, or enough to seed 12,000 acres.

This year Garnet wheat was observed growing in all parts of the west. The section east of Prince Albert and north of Tisdale is practically a Garnet country. It is an early maturing variety, and produces a high proportion of grain to straw. This season serious frost in Saskatchewan on August 22 damaged the immature wheat, but Garnet demonstrated its ability to mature before the frost. It usually ripens a day or two before Ruby, from six to twelve days ahead of Marquis, and three or four days before Reward. This variety has also behaved well under drought conditions.

In 1903 it was reported wheat would never grow in the Peace River country. This year Garnet was being cut here on August 21. Crops were more advanced in the Peace River district than further south, and some of the west's finest crops were seen there. Dr. J. H. Grisdale, Deputy Minister of Agriculture, and Mr. L. H. Newman, driving through the Rio Grande section of the Peace River on August 22, were able to identify 31 varieties of wheat, and of these 16 were Garnet, 7 Marquis, 5 Huron, 1 Turkey Red, 1 Ruby and 1 Reward. This indicates the way in which Garnet wheat is spreading in the west. As an early maturer and good yielder, it has no equal, and once more the Experimental Farm Branch of the Dominion Department of Agriculture must be credited with an epoch-making contribution to Canadian agriculture.

Life Guard—"How much can you carry?"

Merle Man—"Two hundred pounds."

Life Guard—"Suppose there was a woman out in the water drowning and she weighed four hundred pounds. How could you save her?"

Merle Man—"I'd make two trips."

WEDDING OF SOCIAL PROMINENCE

Hon. Robert Forke, minister of immigration, has just announced the marriage of his daughter, Ethel May, to Charles J. McFarland, formerly of Los Angeles and now of Vancouver, the marriage having taken place in Vancouver recently.

Whether Lady Cynthia Mosley and her husband, Sir Oswald Mosley, Labor M.P. for Southwick, England, will accept the baronetcy made vacant by the death of Sir Oswald Mosley is a matter of conjecture. Both scott at titles. Lady Cynthia is the second daughter of the late Marquis Curzon.

Fort Churchill Harbor

Expropriation Proceedings Under Way to Secure Property

Preliminary arrangements for expropriation proceedings in regard to property at Fort Churchill are under way in Ottawa. Judge H. A. Robson, of Winnipeg, is acting for the Dominion government and the private owners are the descendants of William Beach, well known Winnipeg old-timer who was so ardent a believer in the Fort Churchill terminus to the Hudson Bay Railroad that he bought a large tract of territory at this point many years ago.

The Beach estate owns the narrow strip of land running between the harbor and the sea and it is along the inner shore of this peninsula that the harbor works are being constructed.

Hon. Chas. Dunning decided last year, when Churchill was selected as the port, that no private interests should be allowed to own land there at present, and expropriation proceedings accordingly were begun.

Planning Western Air Mail

Ottawa, Ont.—Western Canada is practically assured of an air mail service next year. The officials of the Post Office department are putting the finishing touches to their policy which will be recommended to Hon. Peter Veniot, Postmaster-General, and probably by him to the cabinet and parliament.

"Jack, does your wife drive a car all over now?"

"You guessed it, Bill, sidewalks and all."

Wrong Impression of Canada

English Paper Gives Wield Account of Primitive Conditions

The woman's page editor of the Vancouver Province says: "There isn't a Canadian who at some time or other doesn't bemoan the fact that Canada is regarded at the 'Land of Beyond' by English people. Nearly every person has some amusing story to tell of an Englishman who came to Vancouver looking for bears, or Indians, or who showed surprise at the discovery that this country is in no way different from any other as far as conveniences are concerned."

"It is somewhat surprising to pick up a well-known English daily and see in staring headline, 'A Bridge Party in West Vancouver: How an English Hostess, Makes the Best of Her Primitive Home in the Wilds. And there follows a long account of a trip to the wilds of West Vancouver to a harmless bridge party where the guests regaled themselves on sandwiches, seated on packing boxes or beds."

"No one would argue about the truth of the affair. It may be so, but why a resident of British Columbia should undertake to send items to England stressing the primitive state of this part of Canada is not understandable. So, perhaps, our education needs to start at home, before we try to impress our importance on other countries."

"Charley Paddock, the famous sprinter, is said to be the world's fastest human being."

"Don't forget Cleopatra. She had a mark that's not to be scoffed at."

THE FIRST MOOSE TROPHY

Bringing out with them the first moose shot in opening of the 1928 hunt—Mrs. Oscar Hock, of Miami, treel from La Tuque, Que., at a hunt in the Vermillion after Armand Tremblay. The Hock had an antler spread of from being the largest secured did trophy and was shot in the which the hunting opened.

what was probably Quebec since the spring season, Mr. and Florida reached Monday the conclusion of a successful river section with outcome secured by Mr. 47 inches and while far in the preserve, was a splendid morning of the day on —C.N.A. photo.

Shows How British Columbia Was Retained For Canada By Work of Early Pioneers

Wintering Bees Outside

Tells How Bees Are Successfully Wintered Out-of-Doors

At the Central Experimental Farm at Ottawa a large number of colonies of bees are successfully wintered out-of-doors each year. In his report for 1927, the Dominion Agriculturist tells how the bees are protected and fed. The cases used are four-colony and two-colony and single cases are also used. In packing, planter shavings are used of which three inches are placed under the hives, four or five inches about their sides, and six inches to eight inches on the top. Thirty-eight colonies were wintered on honey and forty-four on sugar syrup. Of those wintered on honey, thirty received shallow food chambers, and eight received deep ones. The bees were able to fly up until November 8 and after February 24. Towards the end of April when the colonies were examined it was found that those wintered on honey were in worse shape than those of the sugar syrup fed group. Eight of the colonies died, of which six received honey and two received syrup. By the tenth of May it was found that in all the live colonies the number of frames covered by the bees averaged 6.5 per colony.

Britishers Who Stick

Ninety-Five Per Cent of Harvesters From Britain Have Made

Notwithstanding the concentrated efforts of a well-organized even though blatant coterie of Communists, ten thousand British miners came to the prairies, and an unexpectedly high percentage of them are remaining to meet the challenge that is Canada's. That challenge of this great Dominion is one that offers to the winner the best there is in life, exemplified by the fact that an immigrant of two decades ago is a senior member of the federal cabinet.

Less than five per cent of the ten thousand miners have gone back, among these are some physically unfit, others mentally disqualified. Some came with the purpose of making the trip a vacation junket, many others came with Communist instruction to foment trouble — and, yet 95 per cent remain.

It's an outstanding defeat for the powers of communism who sought to bring discredit upon both the British workers and upon the Canada that harbors all too many of their type with much too tolerant kindness—Canadian Finance.

A Billion Bushel Crop

Prediction is Made That Canada Will Produce This Much Wheat Annually in Short Time

The 350,000 bushel wheat crop which Canada is harvesting this year leads the "Grain World," of Chicago, in a recent issue to predict that within a comparatively short time the wheat production of Canada will total 1,000,000,000 bushels annually.

If this happens, and the estimate is based on a consideration of the trend of wheat production during the last decade, it will entail a tremendous expansion in railway building, elevator construction, sales of agricultural machinery, and general manufacturing. The total wheat production of the world this year is estimated to be 2,606,306,000 bushels or 50,000,000 bushels more than last year.

With Russia still importing wheat, the Oriental demand growing, the domestic demand increasing, and with the growth in population, it is logical to assume that the wheat production in Canada will continue to increase.

Not Allowed to Forget

A fellow who does not often go to the races attended a meeting one day and had his wallet stolen. This fact he was unlikely forced to report to his wife. The story of his misfortune got around and one day a business acquaintance said to him: "Have you heard anything about your wallet?" "Yes," replied the owner victoriously, "I have, morning—noon—and night!"

The park-keeper found a tramp asleep on one of the seats. "Hi, you!" he cried, shaking the man's shoulder. "I'm going to close the gates."

"All right," murmured the tramp sleepily. "Don't alarm them, will you."

Wash the mouthpiece of the telephone frequently to keep it in sanitary condition.

Had it not been for Sir George Simpson, governor of the Hudson's Bay Company, whose historic visit to the Pacific coast a hundred years ago was celebrated recently the province of British Columbia would be in the possession of the United States, and Canada would have no outlet to the Pacific Ocean.

Perhaps this statement, made by Mr. Charles Vincent Stae, president governor of the Company of Adventurers, did more than anything else to impress on the minds of those gathered at Fort St. James, B.C., for the centenary the importance of the exploits of the man who has been called the Cecil Rhodes of Canada.

The romance of a century ago was brought vividly before their eyes in a pageant which resurrected Simpson's journeying across the wide stretches that ultimately became the Dominion, but after all, the living picture of the governor and his retinue arriving at the fort could not even indicate the far-reaching effect Simpson's activities were to have in the history of North America.

"Fort St. James in those days," said Governor Stae, "was the outpost of an empire; the visible sign of British occupation; a centre of government." He went on to tell of the claims of Spain to all the coast south of the Russian possessions, of Spain's waiving her claims in favor of the United States.

"Our American neighbors," he said, "were disposed to believe that the title was clear to all the south of the Russian possessions. And so it might have been but for the trade and for such men as Alexander MacKenzie, Simon Fraser, John Stuart and Sir George Simpson."

"It was in the struggle between the Northwest Company and the American interest for the country west of the Rocky Mountains that Simon Fraser founded Fort St. James in 1806. The Astorians came and vanished and in 1821 the United States proclaimed her right to the Pacific Coast and Sir George Simpson became the Hudson's Bay Company governor. Three years later, Simpson, to put the affairs of the Columbia district in shape and save the coast from the United States and Russia, crossed the country from York Factory, making the journey in 84 days, 20 days less than any previous record. He established the company's headquarters in such a way as to mark the limits of what he thought should be British territory on the north and south."

Oriental Use Old Papers

Manufacturers of Fireworks and Novelties Find Them Indispensable

Old newspapers may be a problem to you, but in China and Japan they are practically indispensable. Reports to the U.S. Shipping Board show that old newspapers constitute a large share of the ship's cargoes destined for Oriental ports. One day recently newspapers shipped from Los Angeles alone weighed 5,000,000 pounds.

Oriental firecracker and novelty manufacturers use the papers in their products. Total shipments for 1927 to the Orient amounted to 70,018,000 pounds, valued at \$85,425.

A.—Have you seen the conjuror over in the side show?

B.—Now! I suppose it's the usual humbug.

A.—No, sir! This man is a wizard and a real artist. I handed him a counterfeit bill to work with, and he gave me back a real one.

The Chemin de Fer du Nord has always held first place among French railroads for speed.

"If a man wants me for a wife he must be an athlete and be able to run as fast as Nurmii!"

"If a woman wants me for a husband she will have to be able to run faster than Nurmii!"—Lustige Blaetter, Berlin.

Looking Slender

An unusual one-piece dress, cleverly designed to make its wearer appear more slender, with panel front perforated to be cut apart to use contrasting fabrics or colors, as illustrated. A narrow belt, attached at either side of front panel, holds in fullness through the waistline and ties in youthful bow at back. The shaped collar is smart, finishing the flattering square neckline. Style No. 224 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust, and if made of one material, only takes 3 1/2 yards of 40-inch. Printed and plain silk crepe, crepe satin using the two surfaces, printed and plain shantung, printed and plain linen, two tones in flat silk crepe, Jersey, sheer wools or canton-faille crepe are usually pleasing combinations. Pattern price 25 cents in stamps or coin (coin preferred).

Several car loads of cattle, mostly calves, have been shipped from Irma the past week. We are sorry to see so many young cattle, especially calves being shipped out of the district. Most of these calves are being shipped to the central States to be finished on high priced feed.

Here and There

(144)
An effort is being made to establish an airport at Banff, Alberta. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

A further supply of airplanes and airplane parts arrived in Montreal recently when the Canadian Pacific freighter "Beaufort" brought two De Havilland Moth planes, one case of wings and two cases of spare parts.

A call for tenders for a large elevator with a capacity of 1,500,000 bushels has been sent out by the Saint John Harbor Commission. The new structure is to be erected on the Colwell Fuel Company's site, in West Saint John, the work of construction to be got under way as soon as possible.

A Cadillac sedan equipped with rubber insulated steel flanged wheels has been specially equipped by the Angus Shops of the Canadian Pacific Railway at Montreal for the use of the engineering department of that company on inspection trips. The machine has an extra braking system operated by the steering wheel and can make as great a speed on the rails as it can on the highway. Over seventy miles an hour was made on a trial run.

A big black bear tried to stop a Canadian Pacific freight train the other day near Arndale station in Northern Frontenac county in Ontario, and when the encounter was over there was not enough of the bear left to make a pair of mitts. Bruin evidently wandered on to the tracks during the night and was blinded by the glare of the headlights. Black bear are found throughout Eastern Canada but are not often seen, except during the berry season, as they are night prowlers.

Addressing the Board of Trade of Vancouver, recently, E. W. Beatty, Chairman and President of the Canadian Pacific Railway, stated that present prosperity in Canada is clearly indicated by four main factors: Record of railway car loadings (showing the volume of business), employment returns, reports of financial houses, and building construction. These indices were of special value, he remarked, because of the wide range of activity which they reflect. The gross earnings of the company, he added, had been greatly decreased, however, by reduced freight rates.

A unique piece of railway equipment, a dynamometer car, has been constructed by the Angus shops of the Canadian Pacific Railway. The apparatus is intended to test the efficiency of locomotives at various speeds and is placed between the tender and the train during operation. The forces exerted on the coupler of the car are transmitted hydraulically to an instrument known as a chronograph, which records upon a moving sheet of paper. It is stronger by far than any of its predecessors and is said to be the finest car of its kind on the continent. One of its first duties will be the testing of the new "3100" passenger locomotive of the C. P. R., the largest engine in the British Empire.

Half a million automobiles from the United States and the provinces of Canada, carrying a million and a half persons, will enter Montreal during the coming tourist season, according to the estimate of the Montreal Tourist and Convention Bureau.

The use of the combine is expected to be more general than ever in the 1928 harvest. In 1926 there were 176 combines in the Prairie Provinces, 148 being in Saskatchewan, 25 in Alberta and 2 in Manitoba. In 1927 there was a total of 530 in Saskatchewan, 221 in Alberta and 23 in Manitoba, 774 in all.

Household Hints

PEANUT BUTTER BREAD.—Cream together a cup of sugar and three-quarters of a cup of peanut butter. Add one beaten egg, one teaspoon salt, one cup milk, two and a quarter cups flour and four level teaspoons baking powder. Let rise 20 minutes, and bake one hour.

PRUNE BREAD.—Cream two tablespoons of butter with one cup sugar. Add one beaten egg, three-quarters of a cup of chopped nut meats, and one cup of stewed prunes (mashed). Sift one and a half cups white flour, one teaspoon soda, two teaspoons baking powder, one teaspoon salt, and mix with one cup of graham flour. Add these alternately with one cup sour milk and half a cup of prune juice. Bake about an hour and a half, after allowing 20 minutes to rise.

ORANGE BREAD.—Four cups of flour, four teaspoons baking powder, half cup of sugar, one teaspoon salt, one egg, two tablespoons melted butter, one and a half cups orange juice, grated rind of two oranges. Make and bake as for prune bread.

GRAHAM RAISIN BREAD.—Two cups of whole wheat flour, one heaping cup white flour, one egg, one tablespoon shortening, two teaspoons baking powder, one cup each of chopped raisins and nuts. Let rise, and bake as for prune bread.

COCOA BREAD.—Sift together 3 cups flour, one teaspoon cinnamon, one teaspoon salt, four teaspoons baking powder and three tablespoons cocoa. Mix six tablespoons of honey with a scant cup of milk, and add the dry ingredients. Let rise and bake as for prune bread.

STEAMED DATE BREAD.—Take two cups of dates which have been chopped finely and cooked. Mash them well and add three quarters of a cup of either syrup or molasses and two cups of milk. Mix together half a cup of flour, one cup graham flour, (or rye flour, if preferred), one and a half cups of corn meal, one teaspoon each of soda, salt and baking powder. Add a cupful of chopped cherries and a half cup of nuts. Mix all together. Steam for 4 hours in a well-greased mold. If too moist, dry for a few minutes in the oven before removing from the mold. This is delicious with either a spread of butter or of peanut butter.

CHAPTER III.—Continued.

Janet laughed. "I will go now to give you the chance." With a playful flick of her whip toward Douglas, she was off like an arrow.

Donald turned to his friend. "I hope that you are satisfied now that you have made an ass out of me."

"Quite happy, old dear. I didn't find it a hard job."

Donald laughed. "I'll race you to the gym."

As the bout was to take place on Monday, this was to be the last day of training. The fans who had flocked to see Donald in his work-outs admitted that he had wonderful speed, but would be unable to stay the twenty rounds with the formidable Caspian. "The verdict of the knowing ones was that it would take more than a snappy left hand to lift the laurels from the champion who possessed the virtue of the terrible punch."

To the boxer training is a trying ordeal. The daily grind of road-work, bag-punching, rope-skipping and pulley work becomes monotonous. The nerves become frayed, and if the weight has to be materially reduced the boxer develops a bad temper and in anything but a cheerful companion.

As Donald prepared for bed that night he thought with relief that the morrow would be a day of rest. "I'll be glad when I over," he mused. His meditations were interrupted by a rapping on the door. In answer to his invitation to come in, the door opened and a small man of unprepossessing appearance entered.

The visitor was indeed a most repulsive man, of uncertain age, and with skin of a sickly yellow. One eye was sightless, which he ascribed to an accident during a football game. Those familiar with his shady past averred that it was caused by the vigorous application of an adversary's thumb during a bar-room brawl.

"I'm Garrietta's manager," he said importantly.

"What do you want?" demanded Donald shortly.

"Now, see here, kid. We've got a dead clinch to cop de change. It's de way. Youse is a anachor without a chance in de world to beat de Slugger. Get me? Well, dere ain't a bit of sense de de Slugger begtin' you up for nuttin', so we frames de bout. De heavy bettin' will be on de Slugger, so we fixes it for de Slugger to go 'till about de test' round, so's to give de fans a run for dere money. We gets all de money dat we can beg, borrow and steal and puts it on you to win. We puts up a slam-bang fight. You can take de drop a couple of times, and den down goes de Slugger. De fans will just eat it up. De test' round will find you stannin' toe to toe, den de last minute you sends home de fake sleep-punch. De booba will tink it's on de square. Den in a mont' we gets a return fight and we pulls off de 'grudge stuff' and we packs de house. Of course, we have

When Food Sours

PHILLIPS' MILK OF MAGNESEA

For Troubles due to Acid Indigestion, ACID STOMACH, HEARTBURN, HEADACHE, DROWSINESS, NAUSEA.

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

ranks, tier upon tier, from the select ring-side seats to the topmost rail. Judges, lawyers, doctors and bankers sat with labourers, miners, loggers, bartenders, and bootblacks. Men of the underworld sat side by side with men that make and administer our laws. There was a sprinkling of Japs, Chinamen and negroes. The turbaned Hindu made bright splashes of colour here and there in the vast sea of faces. Of class distinction there was none; all welded as one in the love of the boxing game.

The preliminaries were over, and the vast crowd had settled in their seats. Suddenly there was a stir, a craning of necks: Down the aisle on the west side of the arena came Donald, followed by Andy and the two seconds, the latter carrying buckets, sponges, towels and bottles. Donald wore a dark-coloured bathrobe thrown over his shoulders. There was a murmur of applause that swelled to a tumult as he clambered through the ropes. He seemed cool as Andy piloted him to the corner, but as he sat down and stretched out his long legs, he appeared ill at ease.

Although the crowd had given him a handsome welcome, precepts were shouted down from the top seats that he would not last very long with the formidable champion. Donald was palpably nervous, as evidenced in the quick turning of his head and the shuffling of his feet. He looked slight and frail as he leaned forward in his chair, the black bathrobe accentuating the paleness of his face. A feeling of friendliness came over him as he gazed at the huge, strange crowd who were loudly predicting his defeat.

A well-known judge, wearing glasses and a big black hat, turned to his companion. "It's a slimmed shane, Tom, to match that slim boy with a brute like Garrietta!"

The one addressed was one of the City's leading dentists and an ardent boxer fan. "Don't you believe it, Bill," he returned. "Just wait until you see this boy strip."

"Here he comes!"

A roar of applause greeted the champion as he came down the east aisle howling right and left in answer to their plaudits. His dark, massive body seemed fairly to shine as he leaped to the ring with easy grace and stripped off his robe. He stood in his corner with his hands on the still smiling and glancing about the arena. Evidently he loved the limelight.

(To Be Continued.)

Cleopatra's Needle in Position Fifty Years

Queen Victoria Was Interested In Its Arrival At London

It is 50 years since Cleopatra's Needle was set up on the Thames Embankment, in London, England.

The event of interest in which was increased by an adventurous voyage that nearly wrecked the enterprise, around the interest of thousands of Londoners, who gathered on the riverbank to watch the arrival of the obelisk from Alexandria, towed by the Channel tug Anglia.

By using hydraulic rams, John Dixon put the Needle in position in about half an hour. At 3.30 it was upright, and a wild cheer rose from the crowd as the Union Jack and the Egyptian flags were run up on flag-staffs nearby.

All kinds of gifts, to remind posterity of the life of early Victorians, were placed at the base.

A railway guide, "Bibles in different languages, a feeding bottle, a razor, a portrait of Queen Victoria, a box of hairpins, 'photographs of a dozen pretty Englishwomen presented by Captain Henry Carter,' a set of cologne, a pound weight, a foot measure and sundry articles of female adornment, were among the articles deposited.

When Victoria was so interested that when the obelisk arrived, an official statement was issued that she was "much gratified by the safe arrival of the Needle."

Although brought to England only 50 years ago, Cleopatra's Needle, which has no connection with Cleopatra, was presented to the British nation by Mohammed Ali in 1819.

The Needle, of pink granite, now black through exposure, was erected at Heliopolis by Thimmes, or Thutmosis II., a sovereign of the 18th Dynasty about 1500 B.C., and dedicated to Tun of Heliopolis.

Snippy—"Are these eggs fresh?"

Gracious Boy—"The man just brought them from the country."

Snippy—"What country?"

He: "The mere fact that 'you're here' does not worry me. There are others."

She: "That's why I refused you."

N. W. U. 1765.

The Standard of Quality Since 1853

Iron Ochre Discovery

Valuable Find Is Made In Northern Saskatchewan

Discovery of deposits of iron ochre estimated at 50,000 tons has been made near Makwai Lake, Saskatchewan, by William O. Neal, of Ker-robert, who has staked claims under the Dominion quartz mining regulations.

Makwai Lake is almost due north of St. Walburg, the end of the steel on the Canadian National Railways. It can be reached by automobile over rough trails. The ochre deposits were found just south of the south-east arm of the Makwai Lake and a rough estimate suggests that something like 50,000 tons of rich red iron ochre, varying in depth from three to five feet, are available.

Iron ochre has many uses. It is used extensively in the manufacture of paint, for coloring floors, for coloring sand lime brick, as a filler in the manufacture of rubber goods, paper, oilcloth, for coloring match boxes and for coloring stucco. Both the quality and quantity of the iron ochre deposits discovered at Makwai Lake are stated to warrant commercial development. Samples are now being tested for the Department of Railways, Labor and Industries to determine the various properties of the ochre.

Radium Rays Greasily Increased By Platinum

Effect Of Super Ray Ten Times Greater Is Claim

Alois Fischer, Vienna chemist, has succeeded in plating radium with platinum, greatly augmenting the ray strength which is reported to be ten times greater than that of radium alone. Dr. Heiner of the St. Joachimsmath institute announces the successful use of the new super ray in many cases of cancer and other malignant growths with no danger of burning and other risks as with simple radium. Also, an advantage of the new ray is that it requires a minimum of radium, making possible the general use of radium points where radium is too expensive.

As a vernacular effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

It is said that human beings unconsciously associate a color with a particular sound. To the pedestrian, a motor horn suggests both black and blue.

Minard's Liniment for aching joints.

"Rufus, this road is awful steep. Can't I get a donkey to take me up?"

"Lean on me, darling."

All the main railway lines in Rumania are owned and operated by the State.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the Change of Life. It helps me and I can't praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Mrs. D. B. Petrus, Wilton, Ontario.

Ask Your Neighbor

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THERMAL CHANGES

You are fond of ice cream during the hot weather and of iced drinks. But you noticed that upon your last visit to the soda fountain, a certain tooth pained momentarily as you were enjoying your favorite dish.

Or, some toothsome sweet made it "sting"; and also, you found it more comfortable to take your tea not quite so hot. But of course, it isn't bad enough to make a fuss over; a little care exercised and it will be alright again.

So you think. Now what is happening?

You have suspected, and rightly so, a small cavity.

While Nature saw fit to place nerve and blood tissues within the tooth, yet she protected them with the very hard outer covering, the enamel which was meant to remain intact throughout the life time.

But through no fault of Nature, disease has crept in and her plans yet baffled, for she has placed just within the enamel covering, tiny tissue filaments which communicate with nerve endings in the pulp chamber. These respond to thermal changes, sweets and acids, and instantly these are telegraphed to headquarters in the brain, the warning that something is wrong—just as when you put your finger on a red hot stove.

So forewarned, there is yet ample time to prevent more serious trouble if you would but do your part and act promptly by having repairs made.

But do you?

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the great value of an excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

Sound Beam Is Success

Men In Durable, Distinctly Hear Program Of Music

Announcement is made by the Victor Talking Machine Company that the practicability of directing beam sound waves to a definite point had been demonstrated. Officers of the navy dirigible J-4 flying high above Camden, N.J., the announcement stated, distinctly heard the voices of Victor officials, a program of music and constant tone signals sent up to them by the recently developed super-directional horn mounted on the roof of a 10 story building.

The new horn sent out a beam of sound which at all times was trained on the dirigible, much as the beam from a giant searchlight would have been played on it.

People Who Kill a Town

Those who oppose improvements. Those who distrust public-spirited men. Those who over-advertise their business. Those who show no hospitality to anyone. Those who hate to see others make money. Those who oppose every improvement that doesn't originate with themselves. Those who put on an extra-long face when a stranger talks of locating in their town. Those who oppose every public enterprise that does not appear of personal benefit to themselves.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

People are precipitate. Always putting off something till tomorrow instead of the day after tomorrow.

Minard's Liniment—Popular for 50 years.

"All things are relative," says a philosopher. Alas! no. The slower the driver's wills, the faster he goes.

The need of the times is a vehicle you can ride down town and then fold up and carry into the office.

Little Helps For This Week

"Not my will, but Thine be done." Luke xxii. 42.

What'er my Father wills is best, Delight or suffering, toil or rest. Thine eye, and Thine alone, can see What I should have, and do, and be. I only ask that I may know The way which Thou wouldst have me go; That I may will in Thine may lose; That what Thou, Lord, for me shalt choose, I, too, may choose. —C. W. Harris.

There are no disappointments, it has been said, to those whose wills are bound up in the will of God. —The Light of the Conscience.

Even if a worm does turn he's just the same on the other side.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner does than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic or constipation, or diarrhea effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

SPECIAL

Children's Wear

Mothers whose thoughts are now centred on New Frocks, Coats, Sweaters, etc., for the Children, will find a splendid array of New lines and styles awaiting them here.
